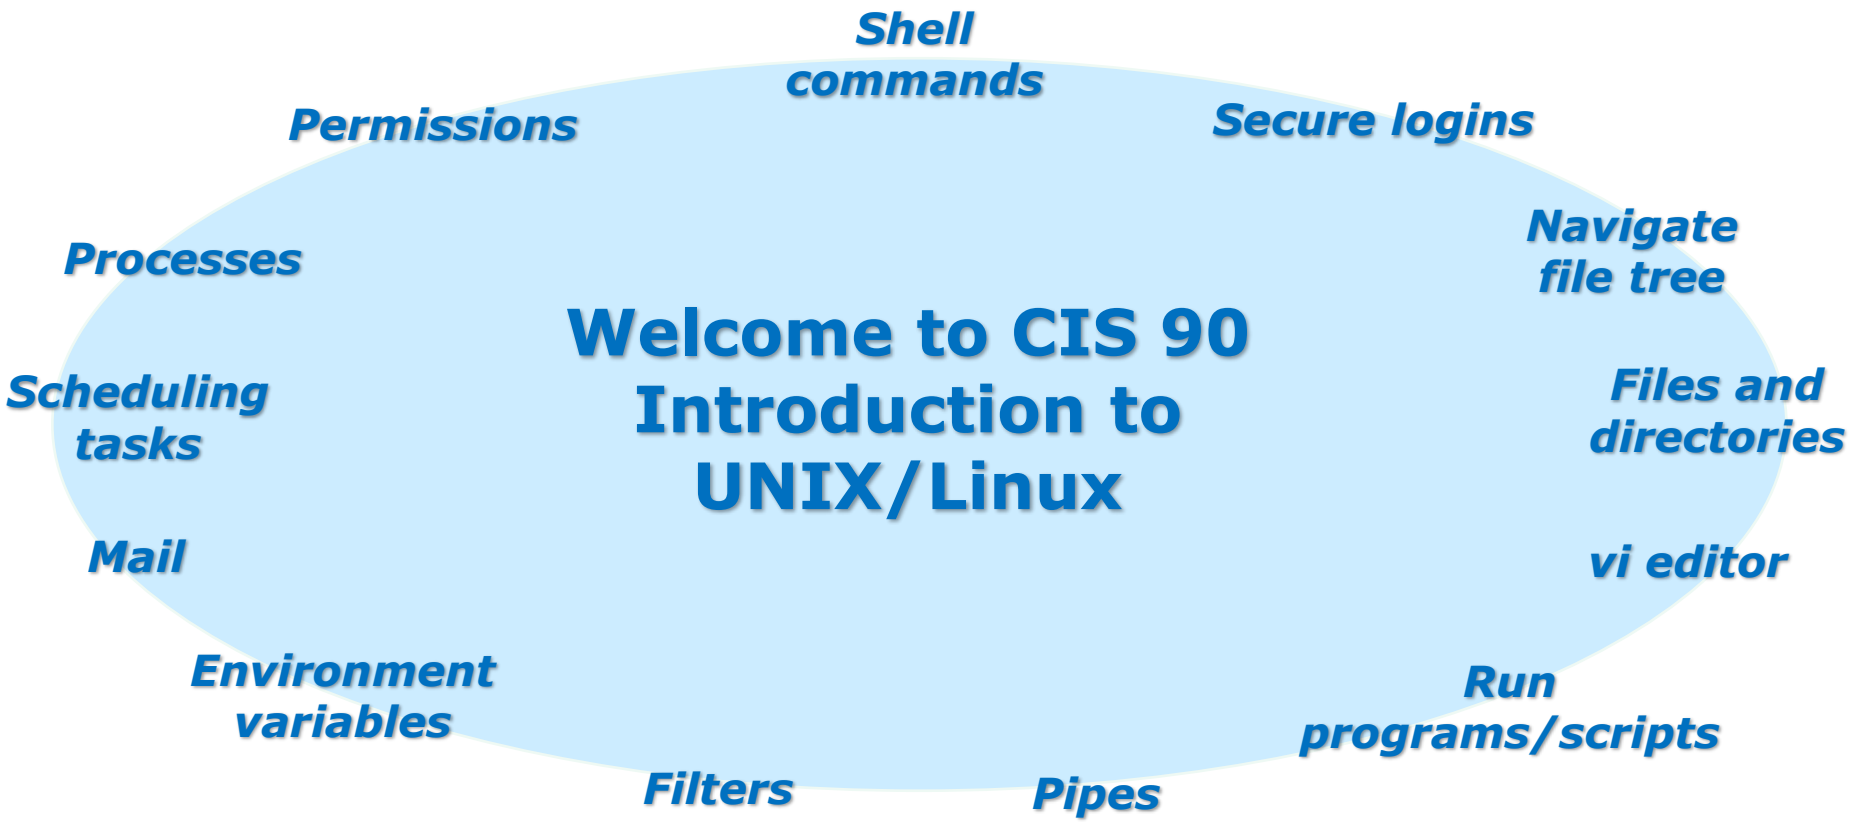
Rich's CCC Confer checklist - setup

- ❑ Slides and Project posted
- ❑ WB converted from PowerPoint
- ❑ Print out agenda slide and annotate page numbers

- ❑ Flash cards
- ❑ Page numbers
- ❑ 1st minute quiz - NA
- ❑ Web Calendar summary
- ❑ Web book pages
- ❑ Commands

- ❑ Dog script examples ready

- ❑ Backup slides, CCC info, handouts on flash drive
- ❑ Spare 9v battery for mic
- ❑ Key card for classroom door



Student Learner Outcomes

1. Navigate and manage the UNIX/Linux file system by viewing, copying, moving, renaming, creating, and removing files and directories.
2. Use the UNIX features of file redirection and pipelines to control the flow of data to and from various commands.
3. With the aid of online manual pages, execute UNIX system commands from either a keyboard or a shell script using correct command syntax.

Introductions and Credits

Jim Griffin
- Created this Linux course
- Created Opus and the CIS VLab
- Jim's site: http://cabrillo.edu/~jgriffin/

Rich Simms
- HP Alumnus
- Started teaching this course in 2008 when Jim went on sabbatical
- Rich's site: http://simms-teach.com

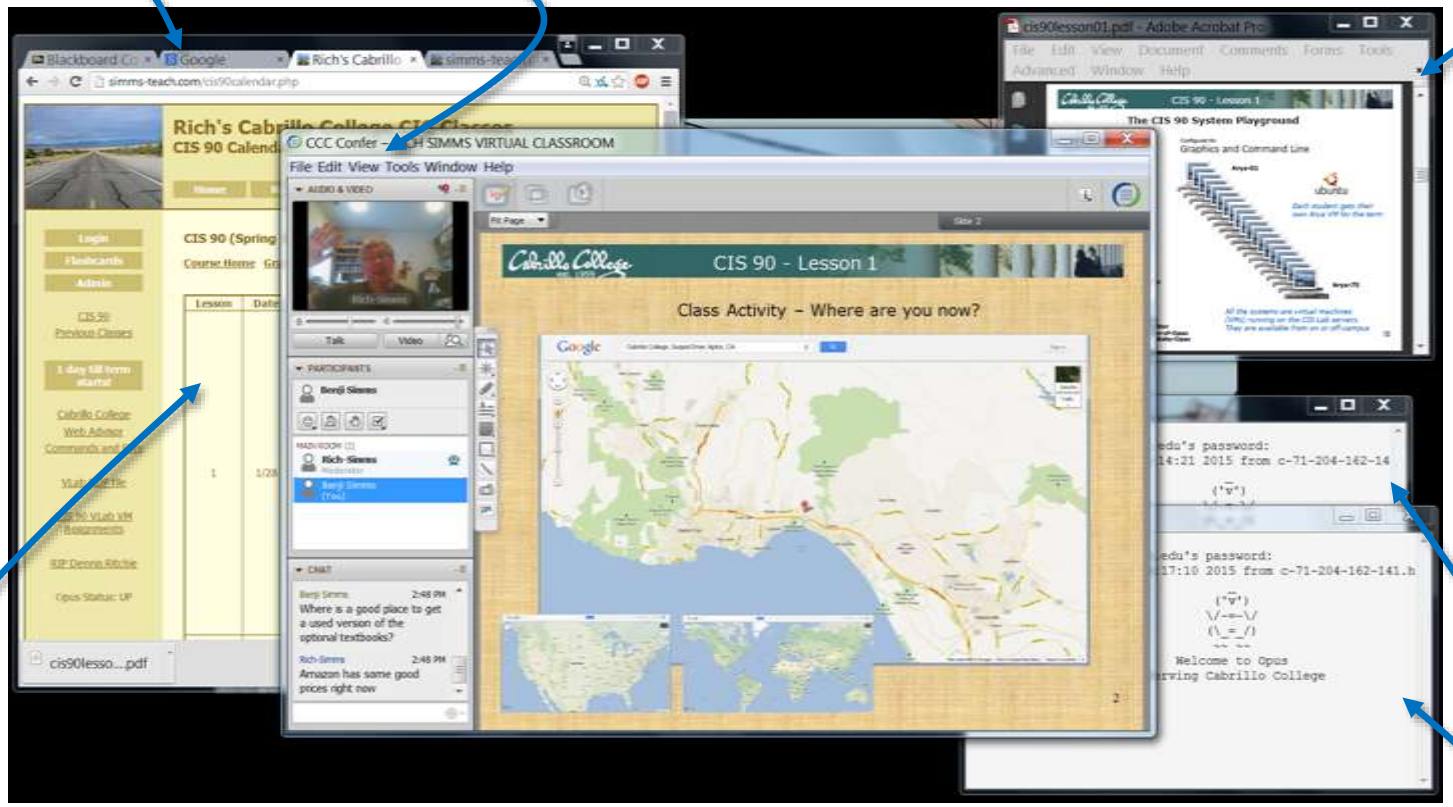
And thanks to:
- John Govsky for many teaching best practices: e.g. the First Minute quizzes, the online forum, and the point grading system (http://teacherjohn.com/)

Student checklist for laying out screen when attending class

- ❑ Browse to the CIS 90 website Calendar page
  1. http://simms-teach.com
  2. Click CIS 90 link on left panel
  3. Click Calendar link near top of content area
  4. Locate today's lesson on the Calendar
- ❑ Download the presentation slides for today's lesson for easier viewing
- ❑ Click Enter virtual classroom to join CCC Confer session
- ❑ Connect to Opus using Putty or ssh command

Student checklist for laying out screen when attending class

- ❑ *Google*
- ❑ *CCC Confer*
- ❑ *Downloaded PDF of Lesson Slides*



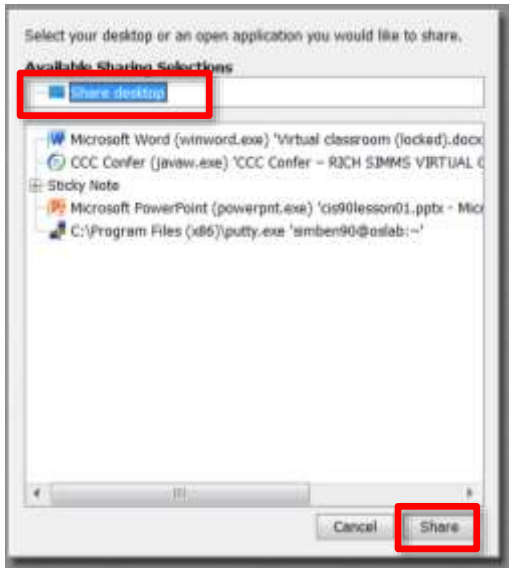
- ❑ *CIS 90 website Calendar page*
- ❑ *One or more login sessions to Opus*

Student checklist for sharing desktop with classmates

1) Instructor gives you sharing privileges

2) Click overlapping rectangles icon. If white "Start Sharing" text is present then click it as well.

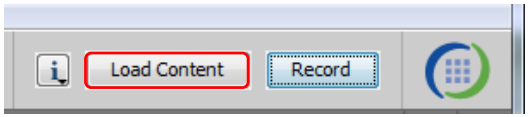
3) Click OK button.



4) Select "Share desktop" and click Share button.

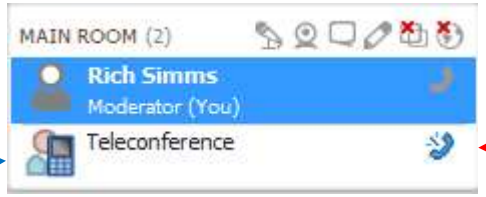
Rich's CCC Confer checklist - setup

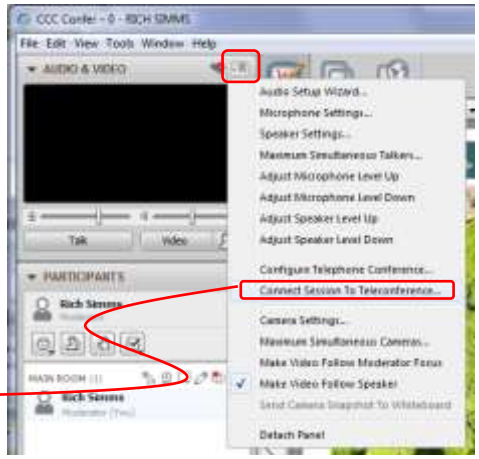
[ ] Preload White Board



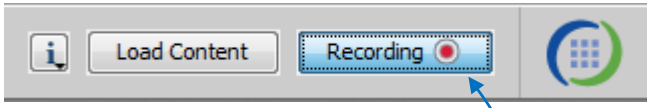
[ ] Connect session to Teleconference

Session now connected to teleconference





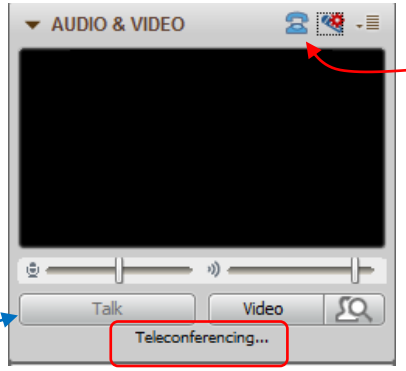
[ ] Is recording on?



Red dot means recording

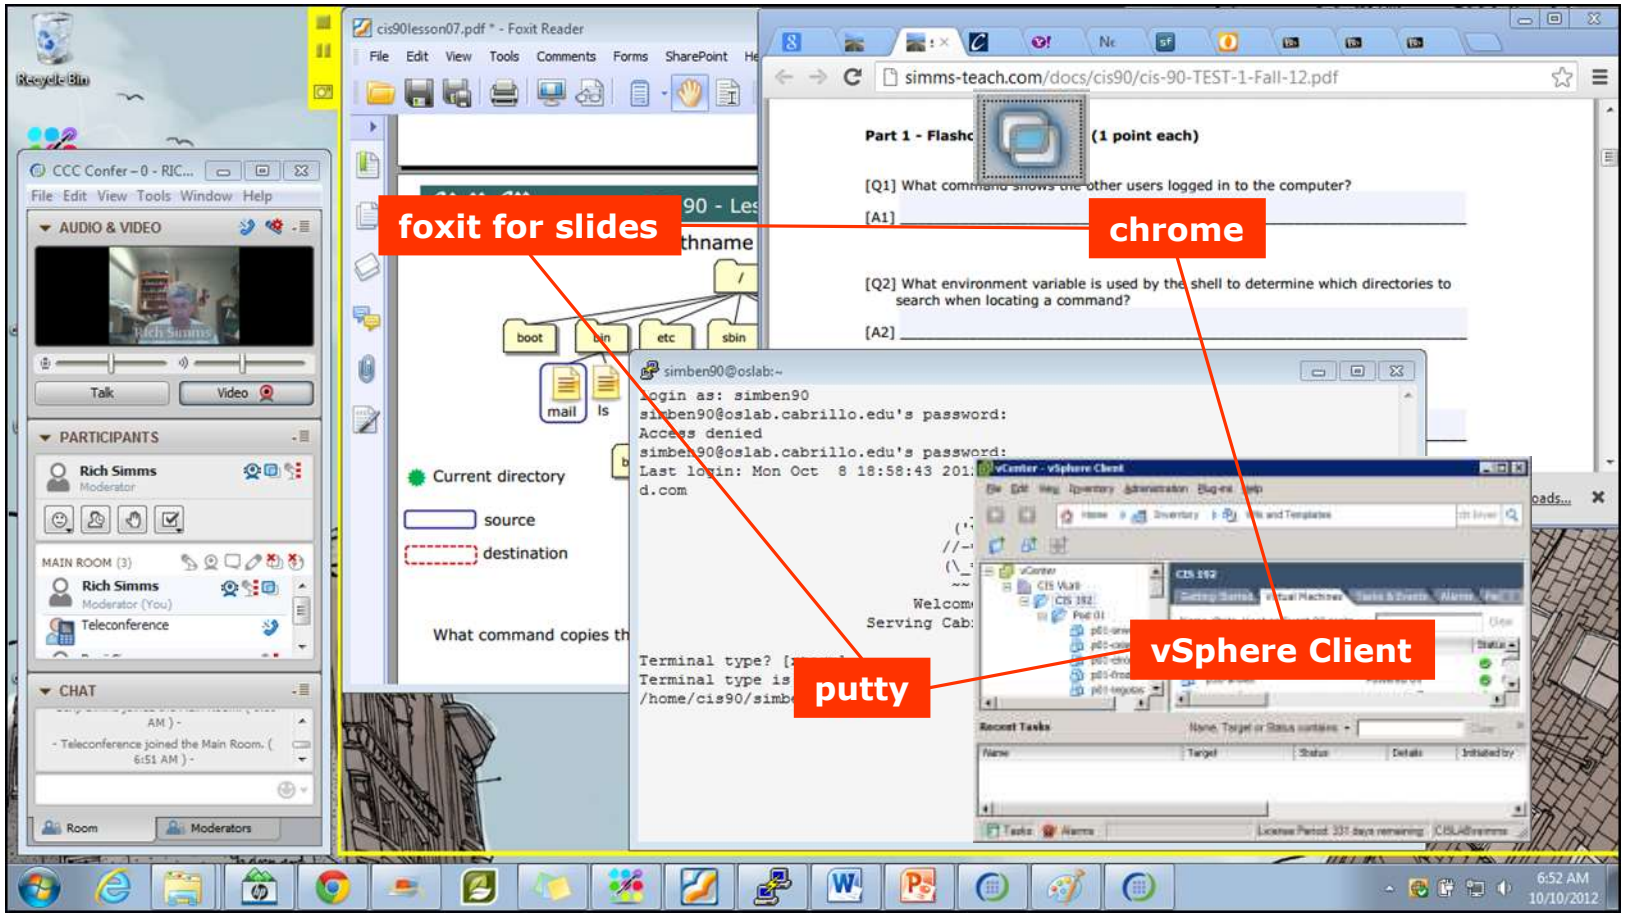
[ ] Use teleconferencing, not mic

Should be greyed out



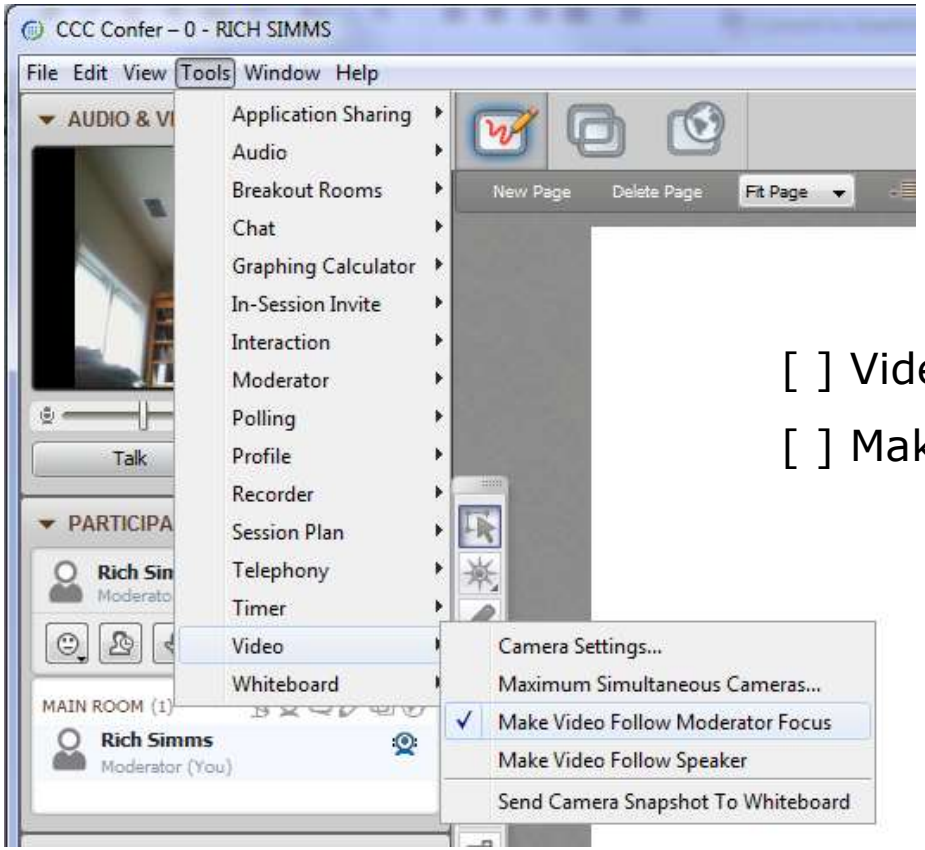
Should show as this live "off hook" telephone handset icon and the Teleconferencing … message displayed

Rich's CCC Confer checklist - screen layout and share



[ ] layout and share apps

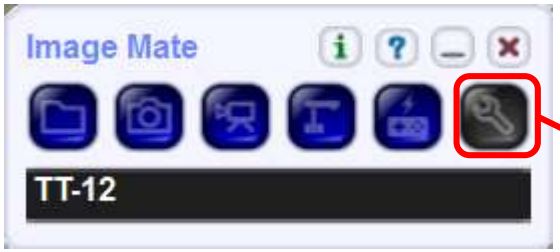
Rich's CCC Confer checklist - webcam setup

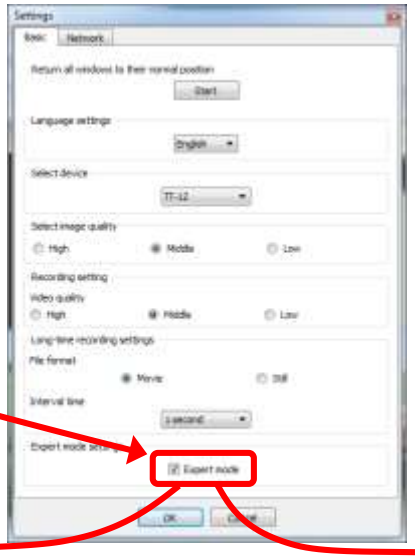


[ ] Video (webcam)

[ ] Make Video Follow Moderator Focus

Rich's CCC Confer checklist - Elmo





The "rotate image" button is necessary if you use both the side table and the white board.

Quite interesting that they consider you to be an "expert" in order to use this button!

Elmo rotated down to view side table

Elmo rotated up to view white board

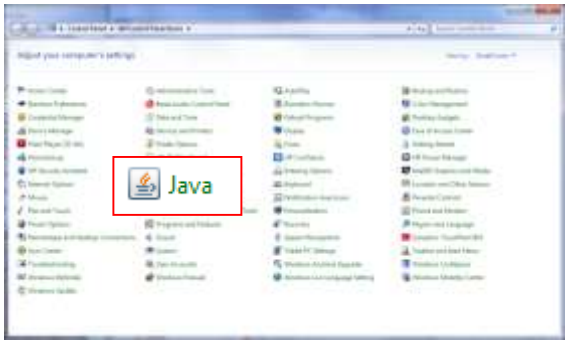
Run and share the Image Mate program just as you would any other app with CCC Confer

Rich's CCC Confer checklist - universal fix

Universal Fix for CCC Confer:

1) Shrink (500 MB) and delete Java cache
2) Uninstall and reinstall latest Java runtime
3) http://www.cccconfer.org/support/technicalSupport.aspx

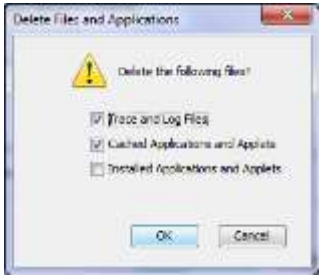
Control Panel (small icons)



General Tab > Settings…

500MB cache size

Delete these



Google Java download

Start

Sound Check

*Students that dial-in should mute their line using *6 to prevent unintended noises distracting the web conference.*

*Instructor can use *96 to mute all student lines.*

Instructor: **Rich Simms**
Dial-in: **888-886-3951**
Passcode: **136690**

Quiz

No Quiz Today !

More Shell Scripting

Objectives	Agenda
• Transfer files between computers • Archive files using tar • Learn some scripting techniques	• No Quiz • Questions • Printing (if necessary) • scp • scp practice • tar • tar + scp • Housekeeping • Refresh on shell scripts • Project • Scripting tips - vi • Scripting tips - sleep • Scripting tips $(cmd) and `cmd` • Scripting tips - field extraction • Scripting tips - simple if • Scripting tips - or logic • Scripting tips - and logic • Scripting tips - file types • Scripting tips - if-then-else • Scripting tips - set command • Scripting tips - color • Scripting tips - username <-> home directory • Scripting tips - simple for loop • Assignment • Wrap up

Questions

Questions?

Lesson material?

Labs? Tests?

How this course works?

- Graded work in home directories
- Answers in /home/cis90/answers

Who questions much, shall learn much, and retain much.
- Francis Bacon

If you don't ask, you don't get.
- Mahatma Gandhi

Chinese Proverb	他問一個問題，五分鐘是個傻子，他不問一個問題仍然是一個傻瓜永遠。 *He who asks a question is a fool for five minutes; he who does not ask a question remains a fool forever.*

Printers

Sneak Peak for CIS 90 Students

Two predominate types of printers

- Thermal inkjet technology
- Laser, drum, toner technology

So many ways to hook them up …

Now:
- Network
- USB
- Wireless (Bluetooth, IR)

Back then:
- Serial cable
- Parallel printer cable

Printer Configuration via CUPS

CUPS Demo on Rpi and HP Envy 4500

Raspberry Pi configuration

1. Bootup with monitor
2. Connect to wireless CIS90Net
   (might need HDMI monitor and keyboard)
3. As root:
   usermod -a -G lpadmin *username*
   apt-get update
   apt-get install cups
   apt-get install hplip
   apt-get install sysvbanner
   apt-get install tightvncserver
4. As *username*:
   vncserver

Classroom Instructor PC

- Instructor PC: install tightvnc from http://www.tightvnc.com/
- Run Elmo Image Mate in expert mode and rotate image
- Run TightVNC Viewer and connect to: <Raspberry Pi IP>:5901
  - Browse to http://localhost:631

CIS Router

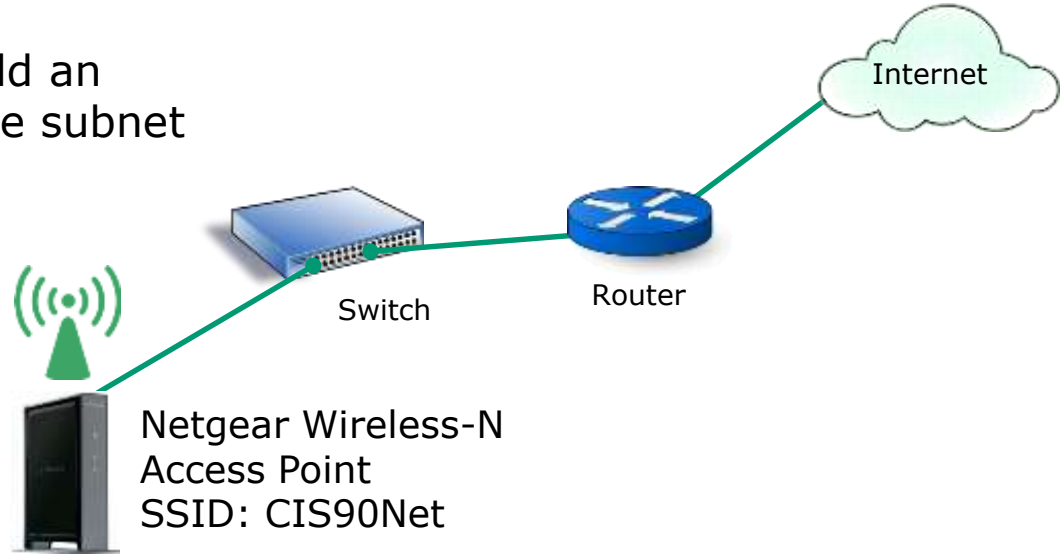
```
ip dhcp pool rp07
  host 172.30.1.34 255.255.255.0
  client-identifier 01ec.1a59.d62c.c0

ip dhcp pool hpenvy4500
  host 172.30.1.35 255.255.255.0
  client-identifier 0158.20b1.f1e2.66
```

NoCry#**show ip dhcp binding**

CUPS Demo on Rpi and HP Envy 4500

This example will show how to add an HP Envy 4500 printer on the same subnet as the Linux server.



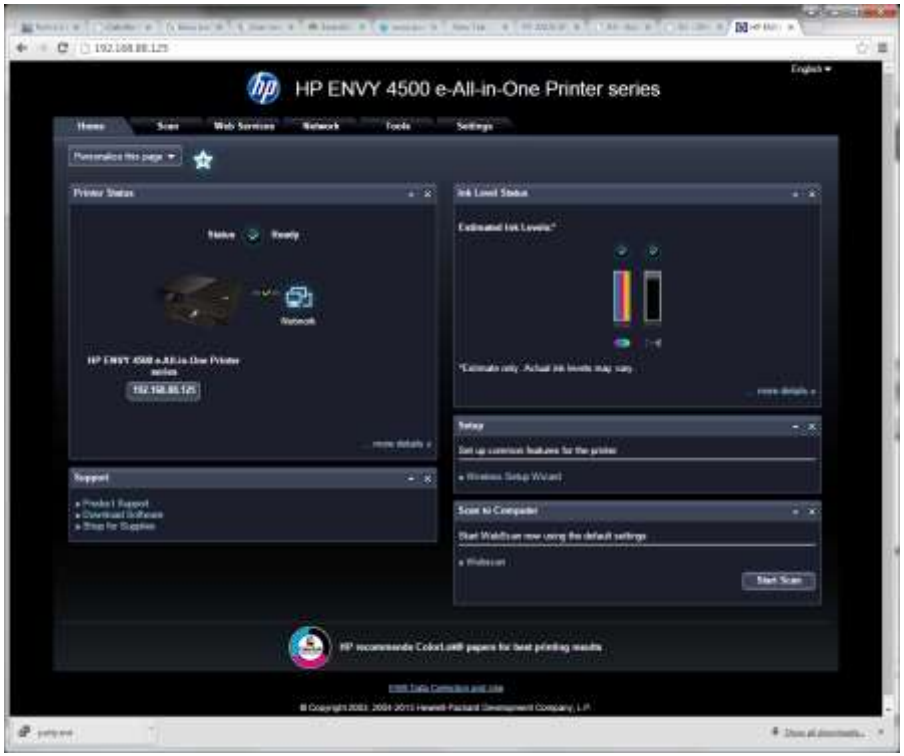
Raspberry Pi 2
Raspian GNU/Linux 8 (Jessie)
+ Belkin N300 Wireless USB Adapter
Mac: EC:1A:59:D6:2C:C0

HP Envy 4500 Printer
(Wireless Interface)
Mac: 58:20:B1:F1:E2:66

CUPS Demo on Rpi and HP Envy 4500

IP Address for this printer is:
192.168.88.125 (home)
172.30.1.35 (room 828)

Networked HP printers have a built in web-server



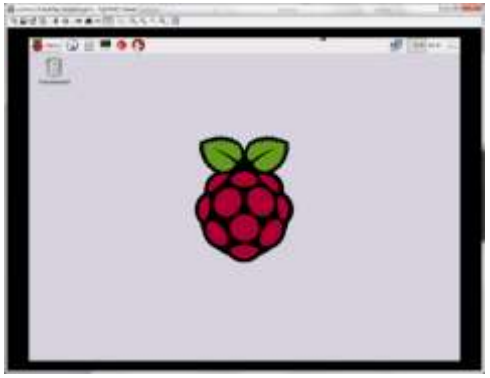
Browsing to the IP address of the printer

CUPS Demo on Rpi and HP Envy 4500

IP Address for this RPi is:
- 192.168.88.122 (home)
- 172.30.1.34 (room 828)

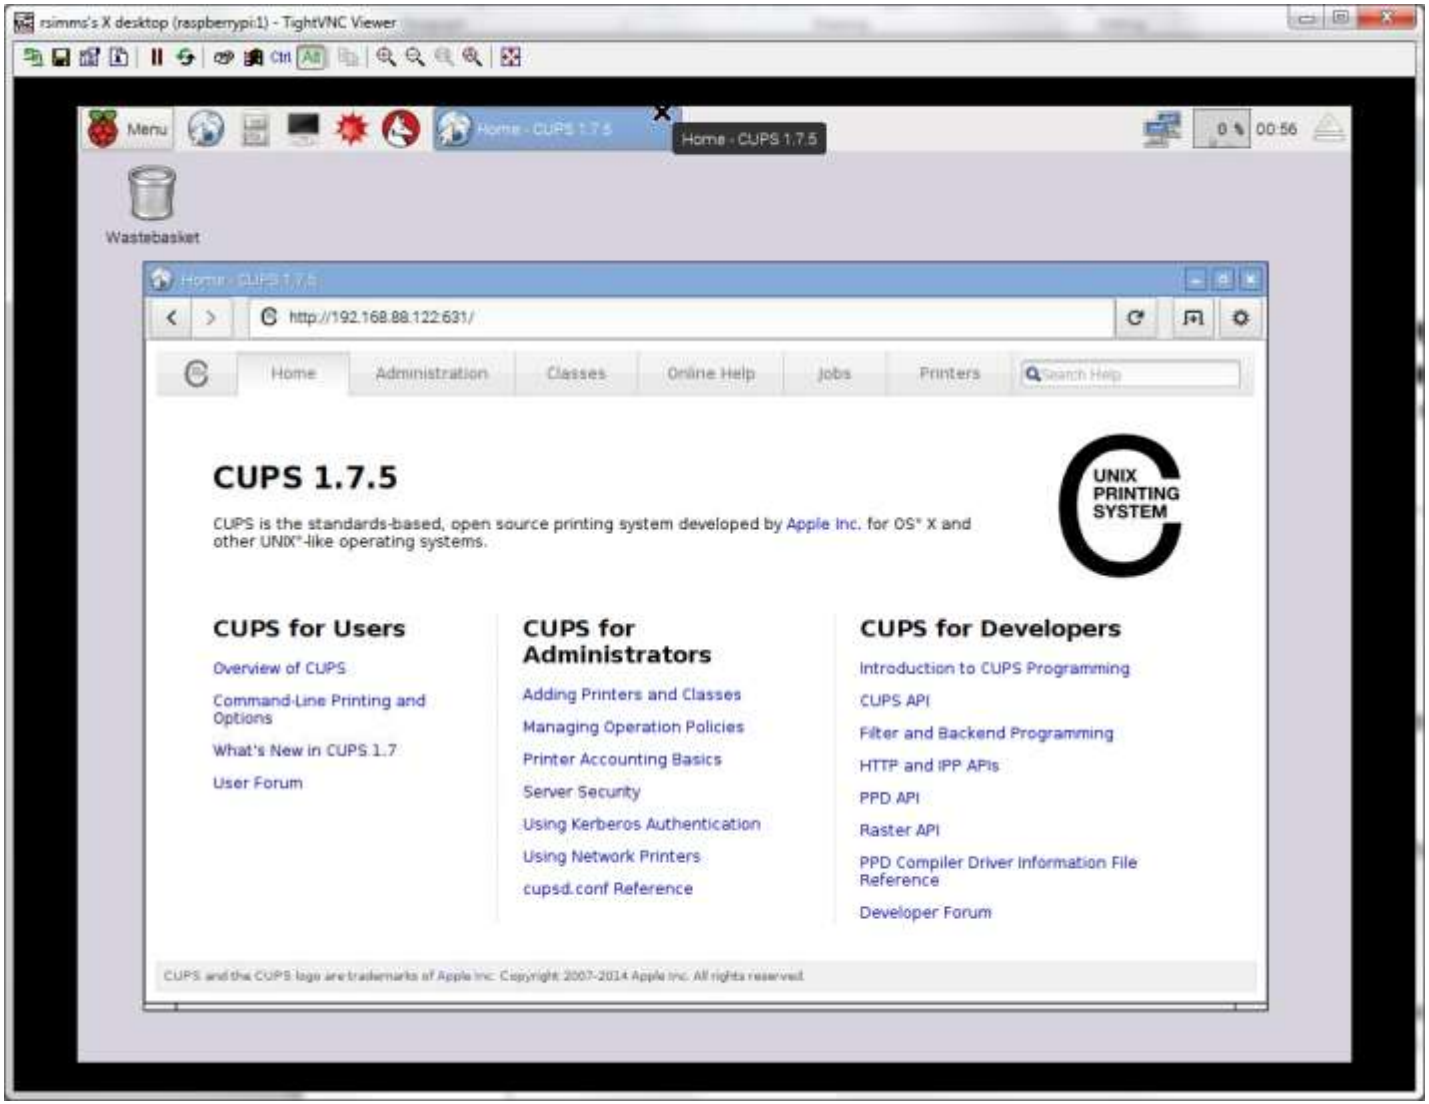
Local access with monitor, keyboard and mouse

SSH access over network

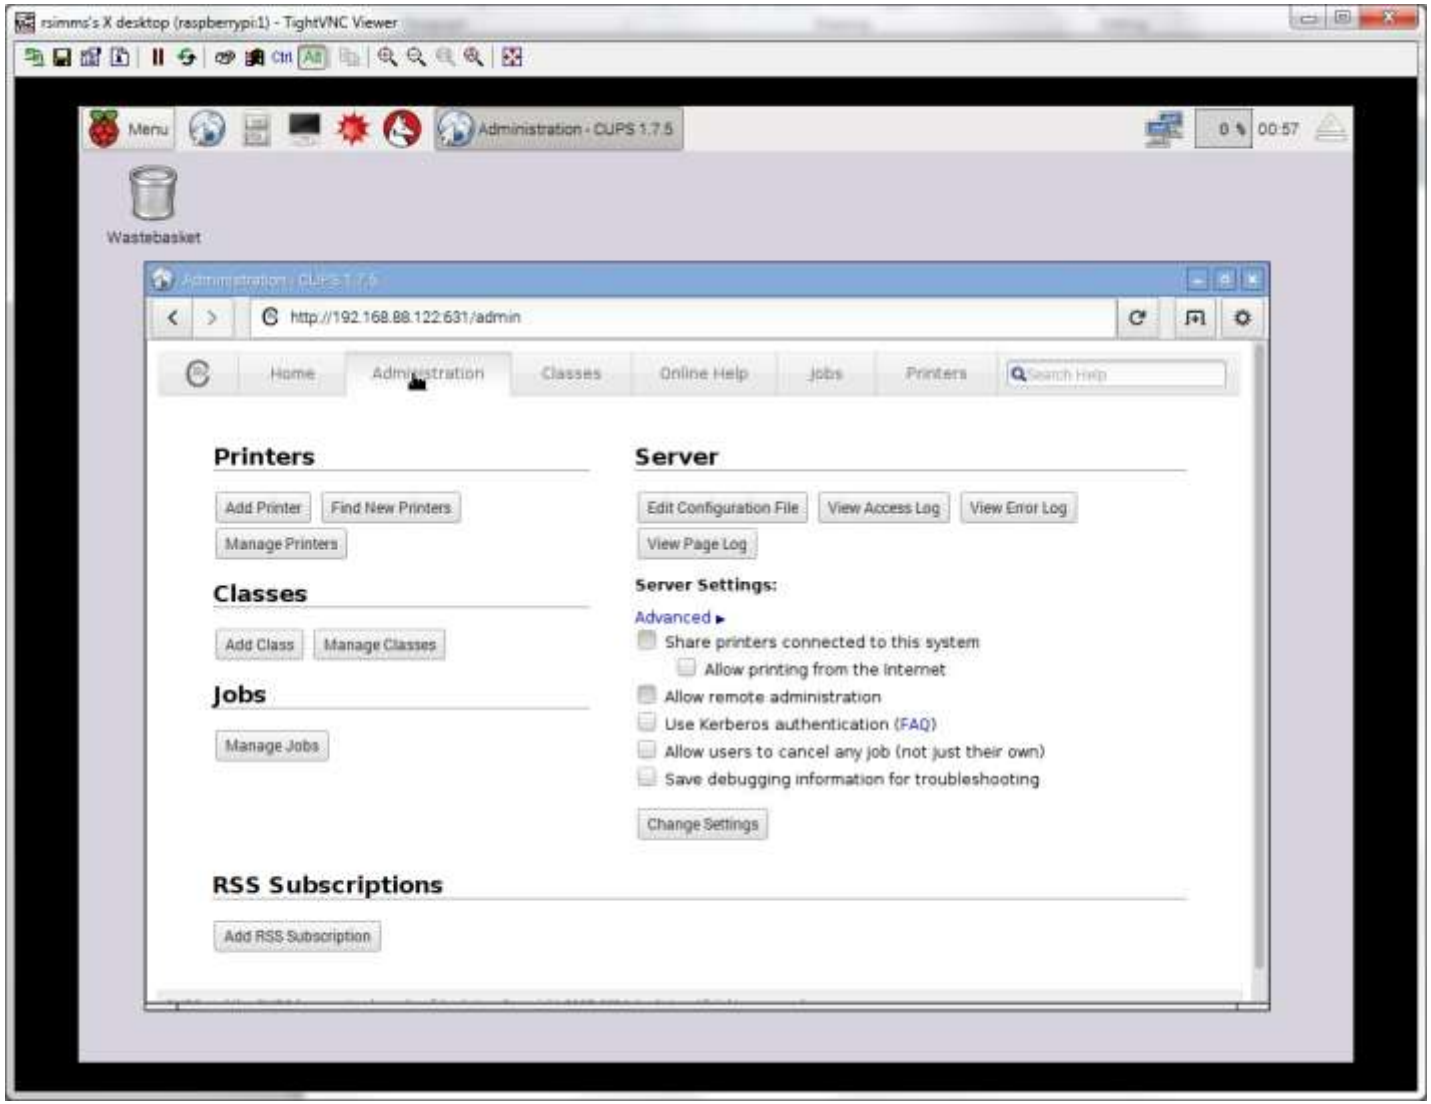


VNC access over network

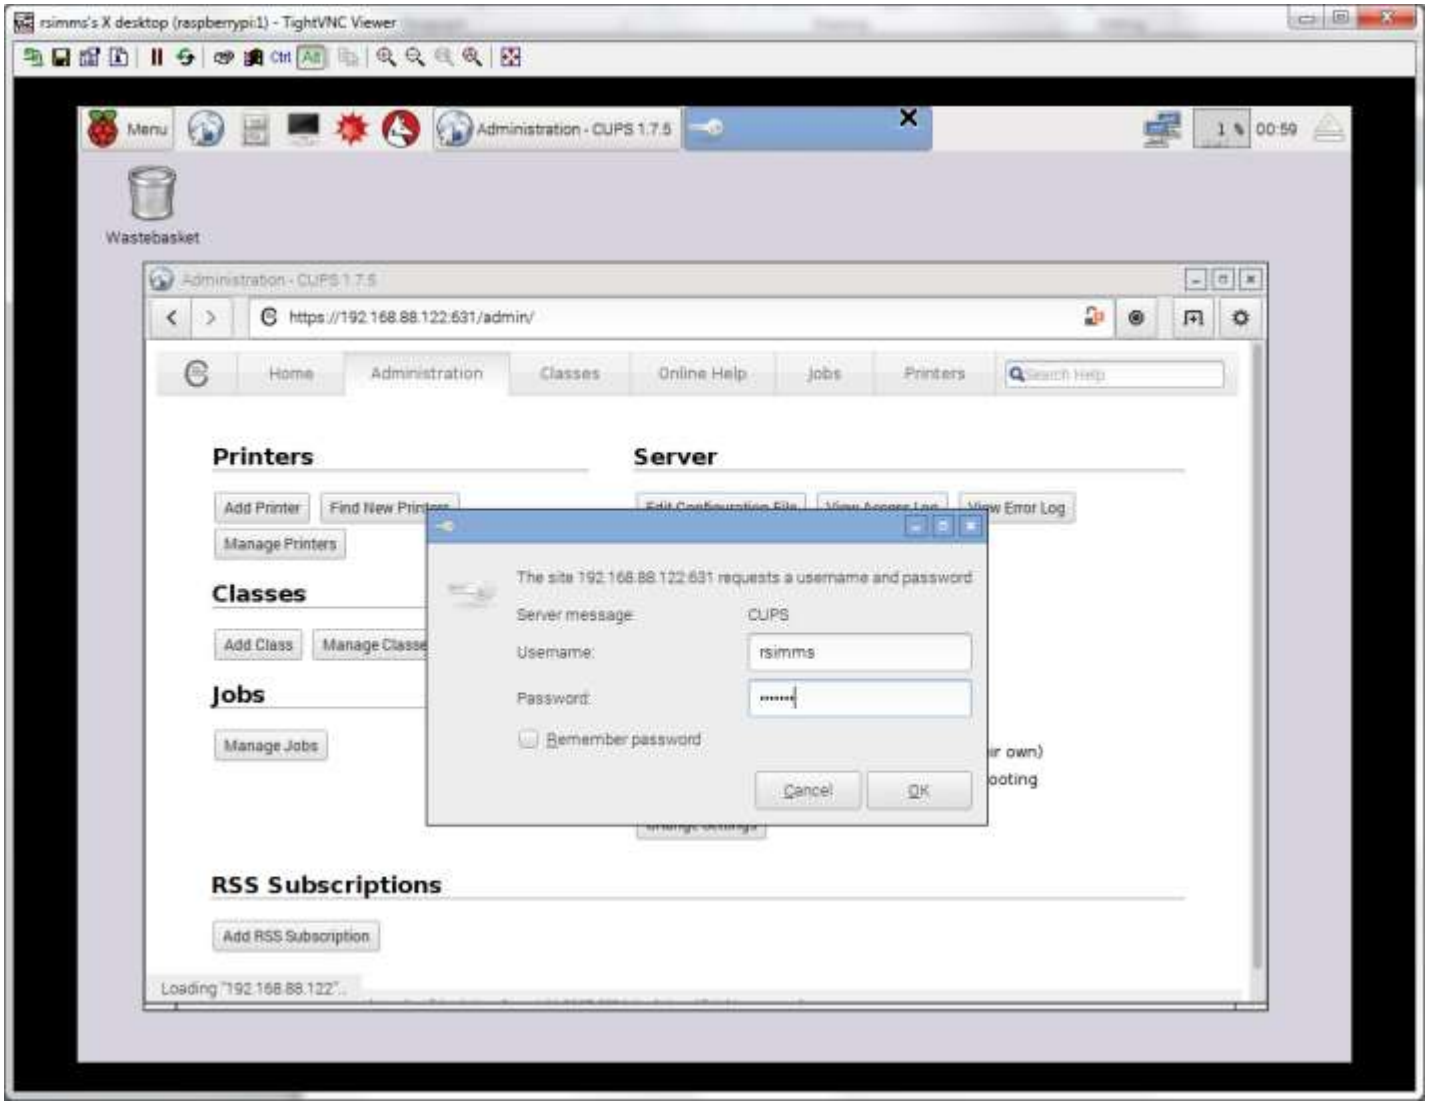
Browse to CUPS service at <server-ip-address>:631



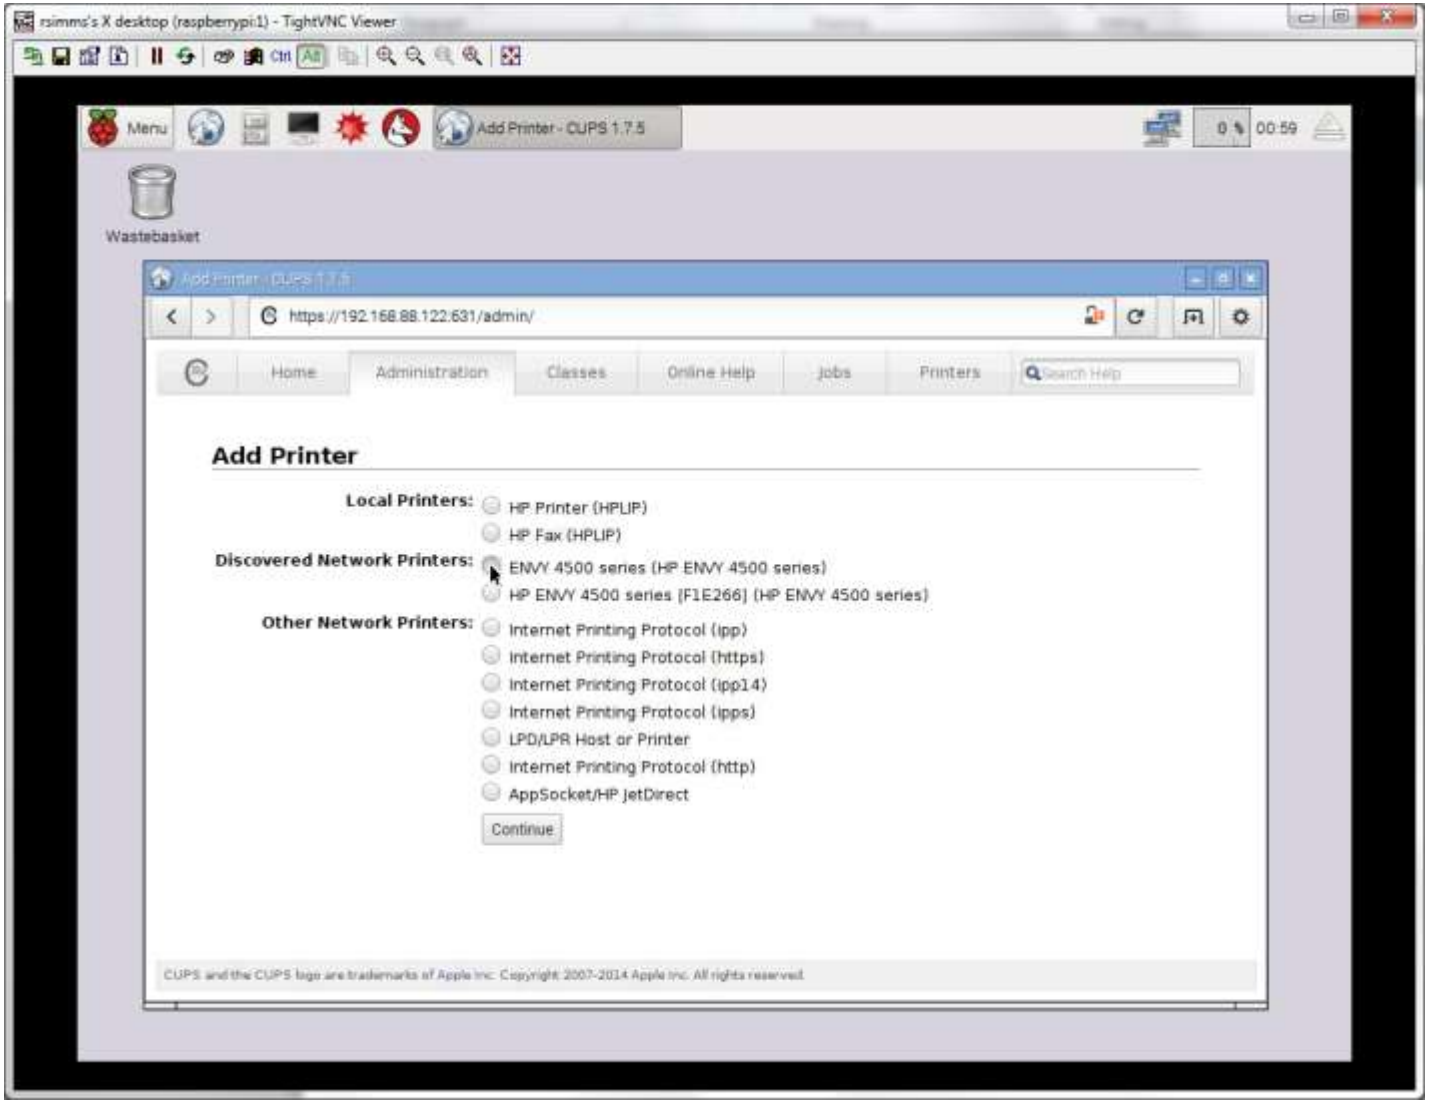
Select Administration tab



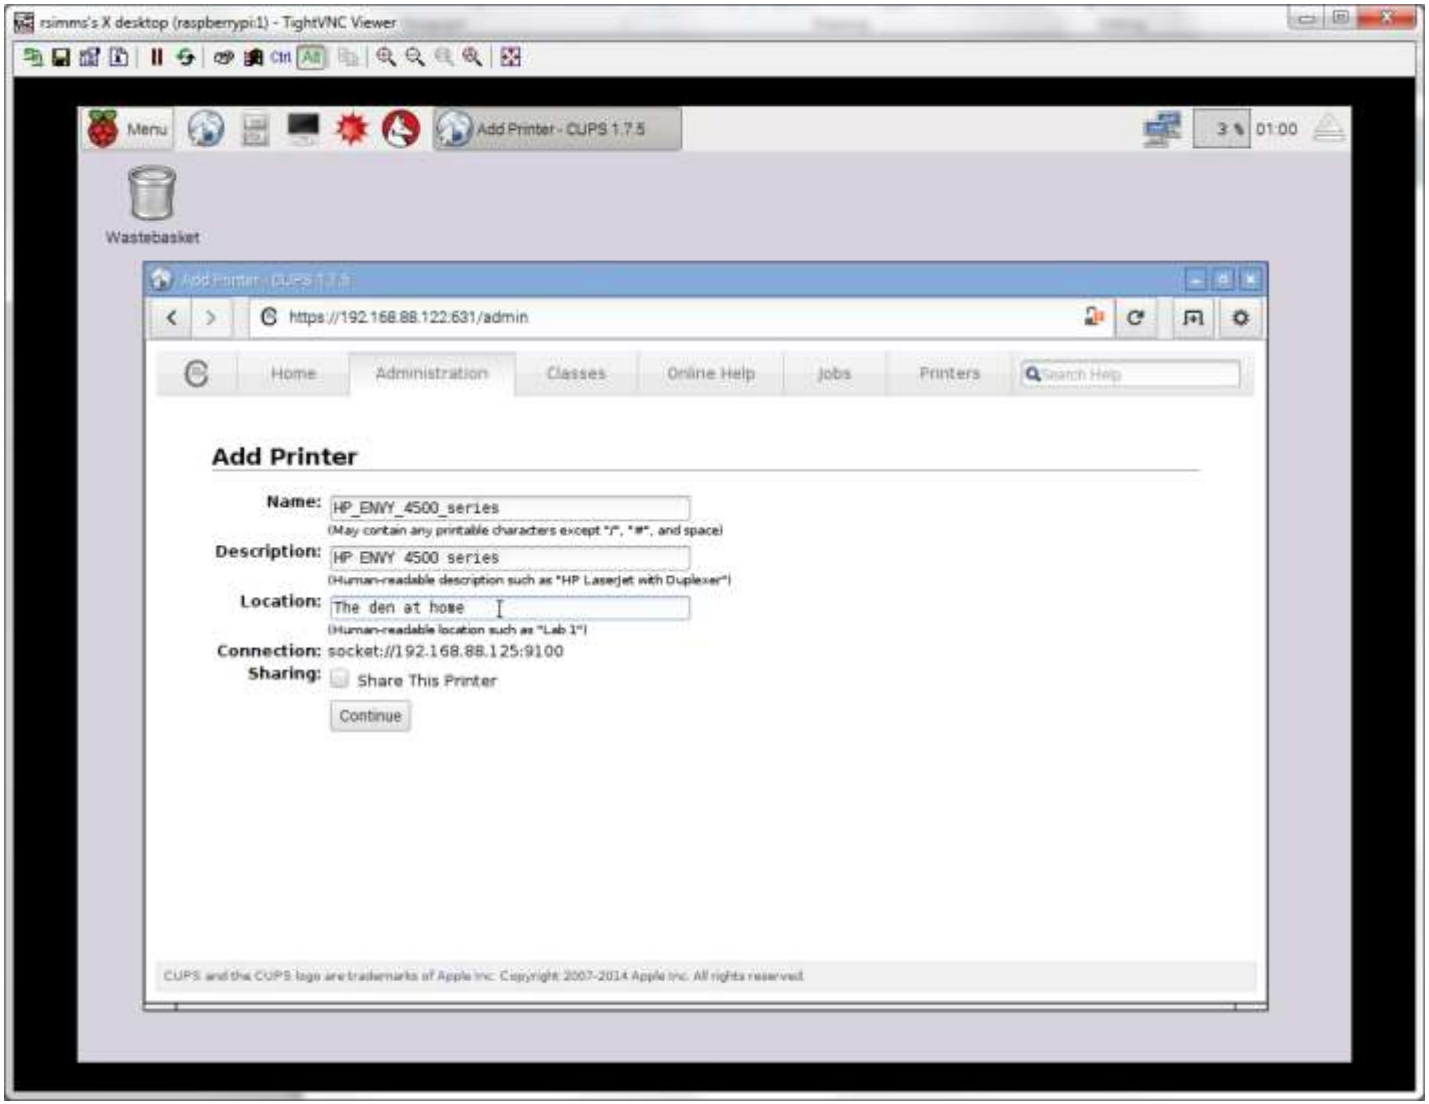
Click Add Printer button and authenticate with user belonging to lpadmin group



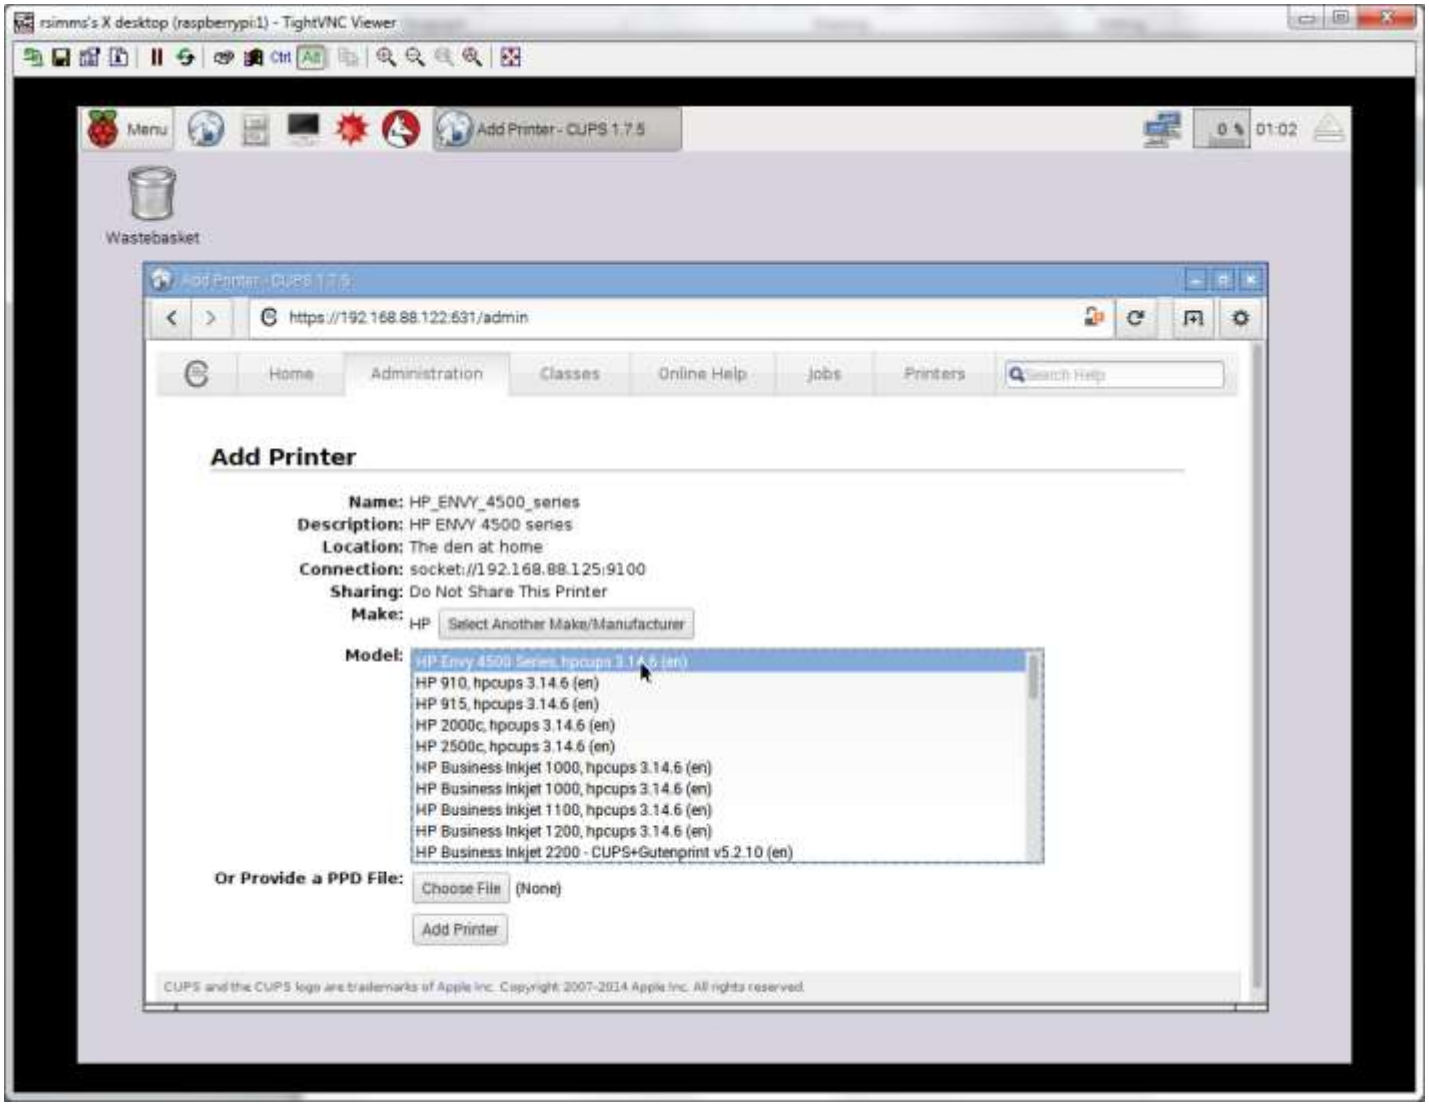
CUPS discovers and displays printers found on network. Select the printer to install.



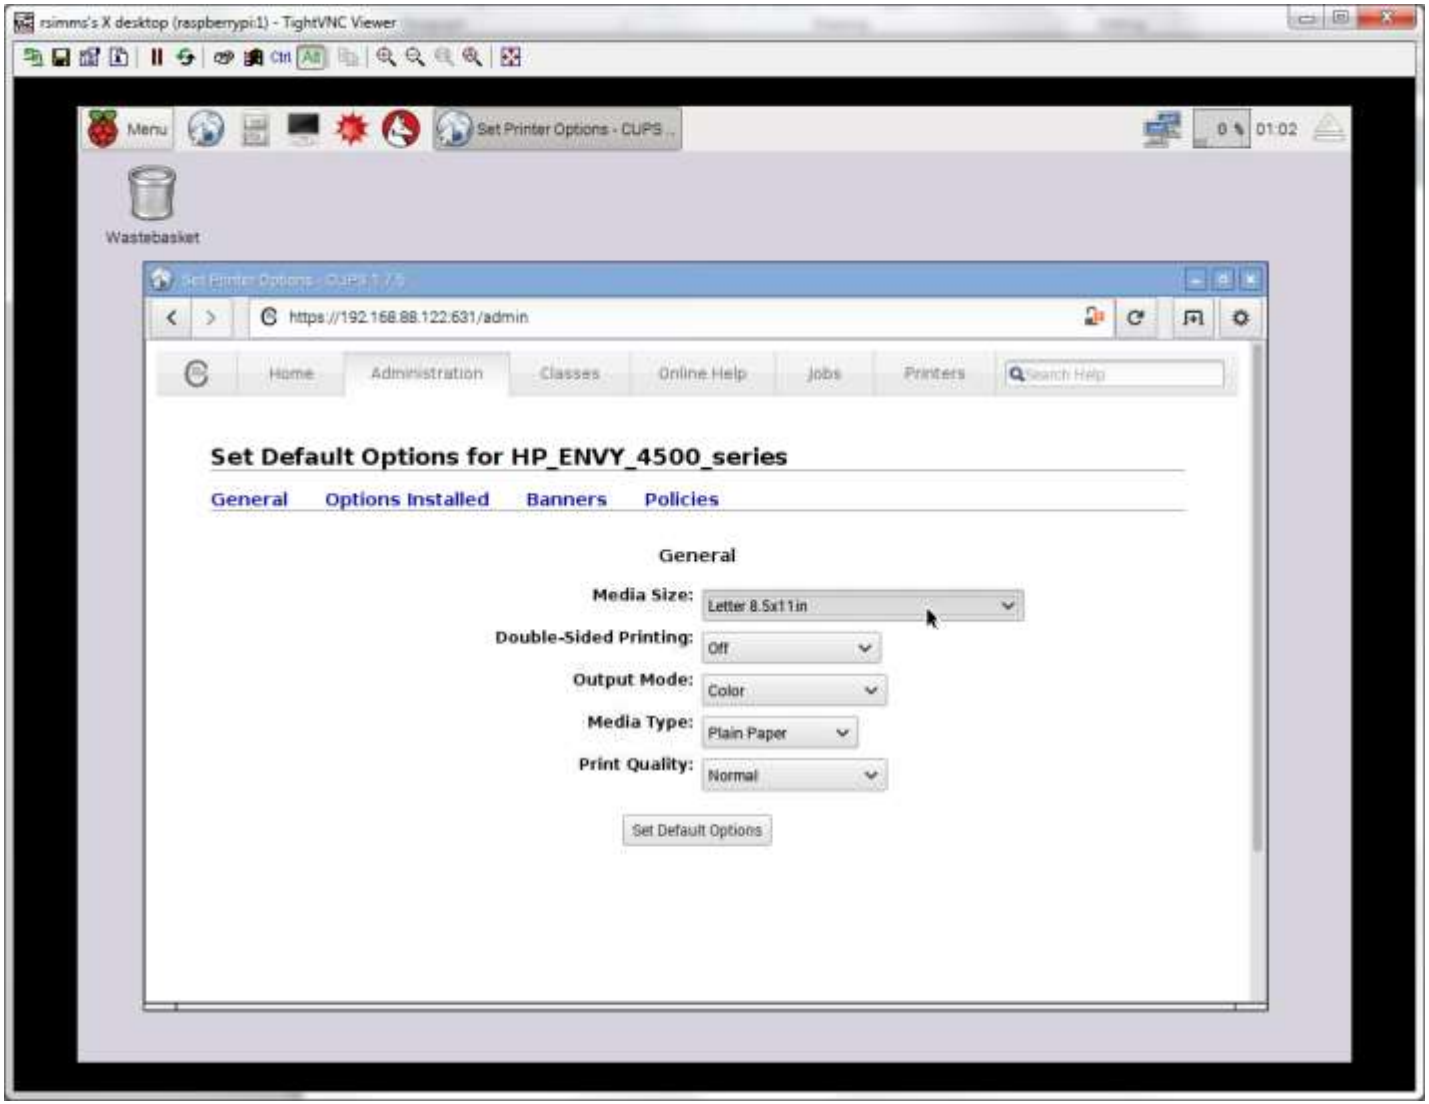
Add some information about the printer



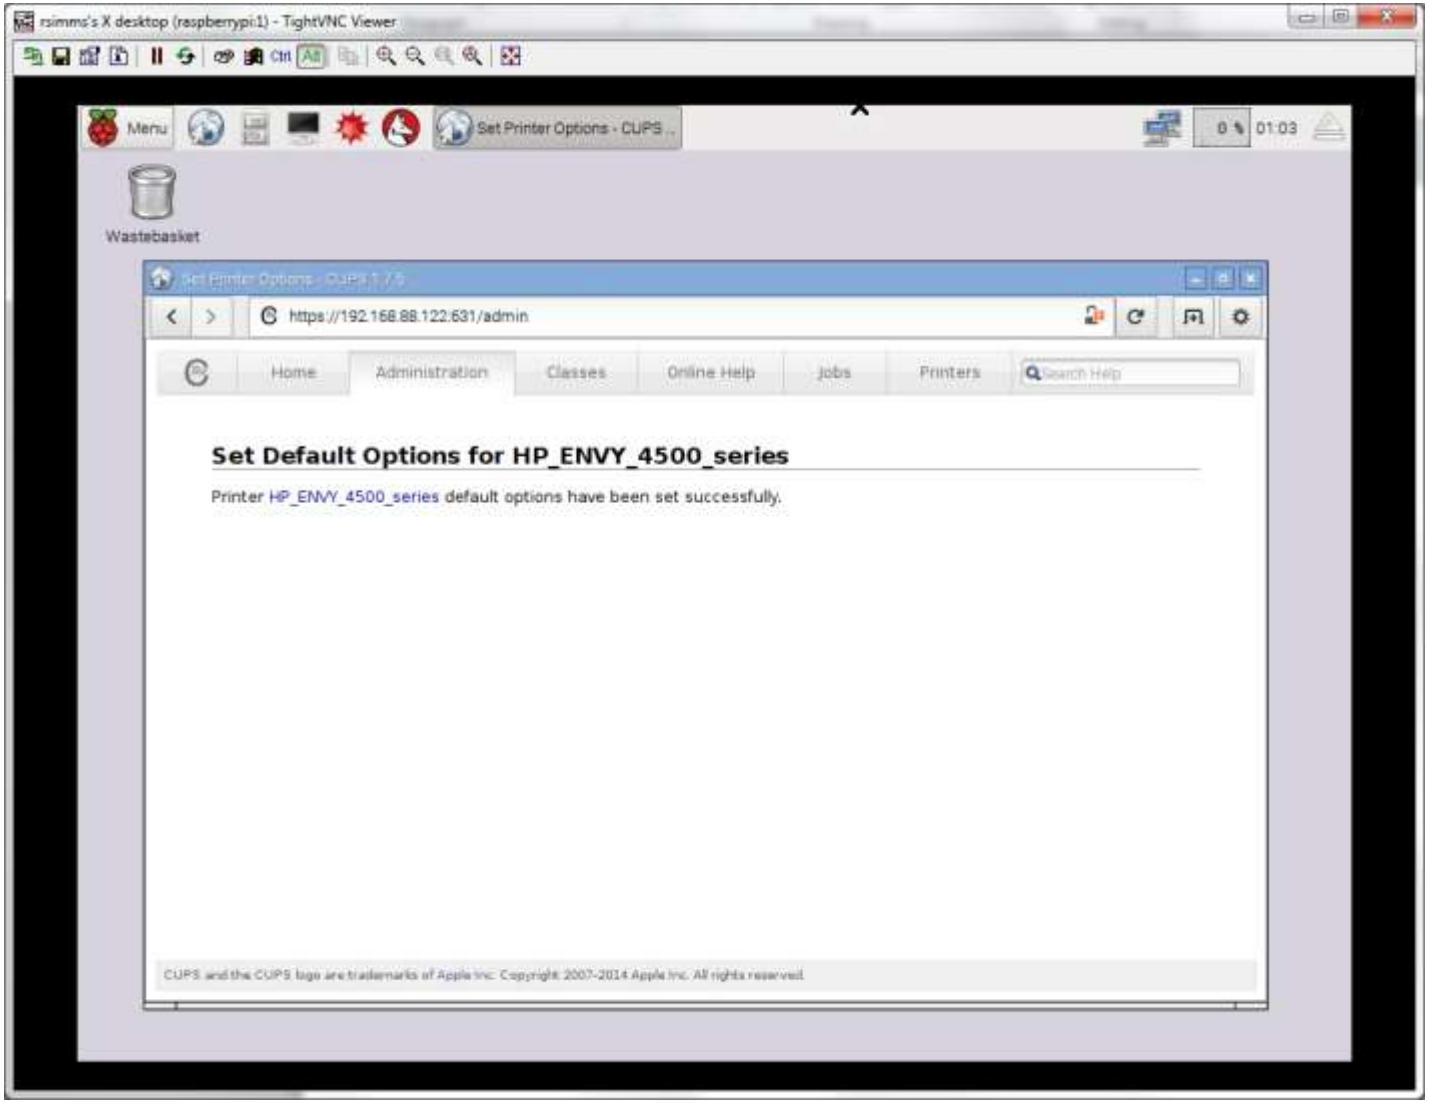
Add the printer



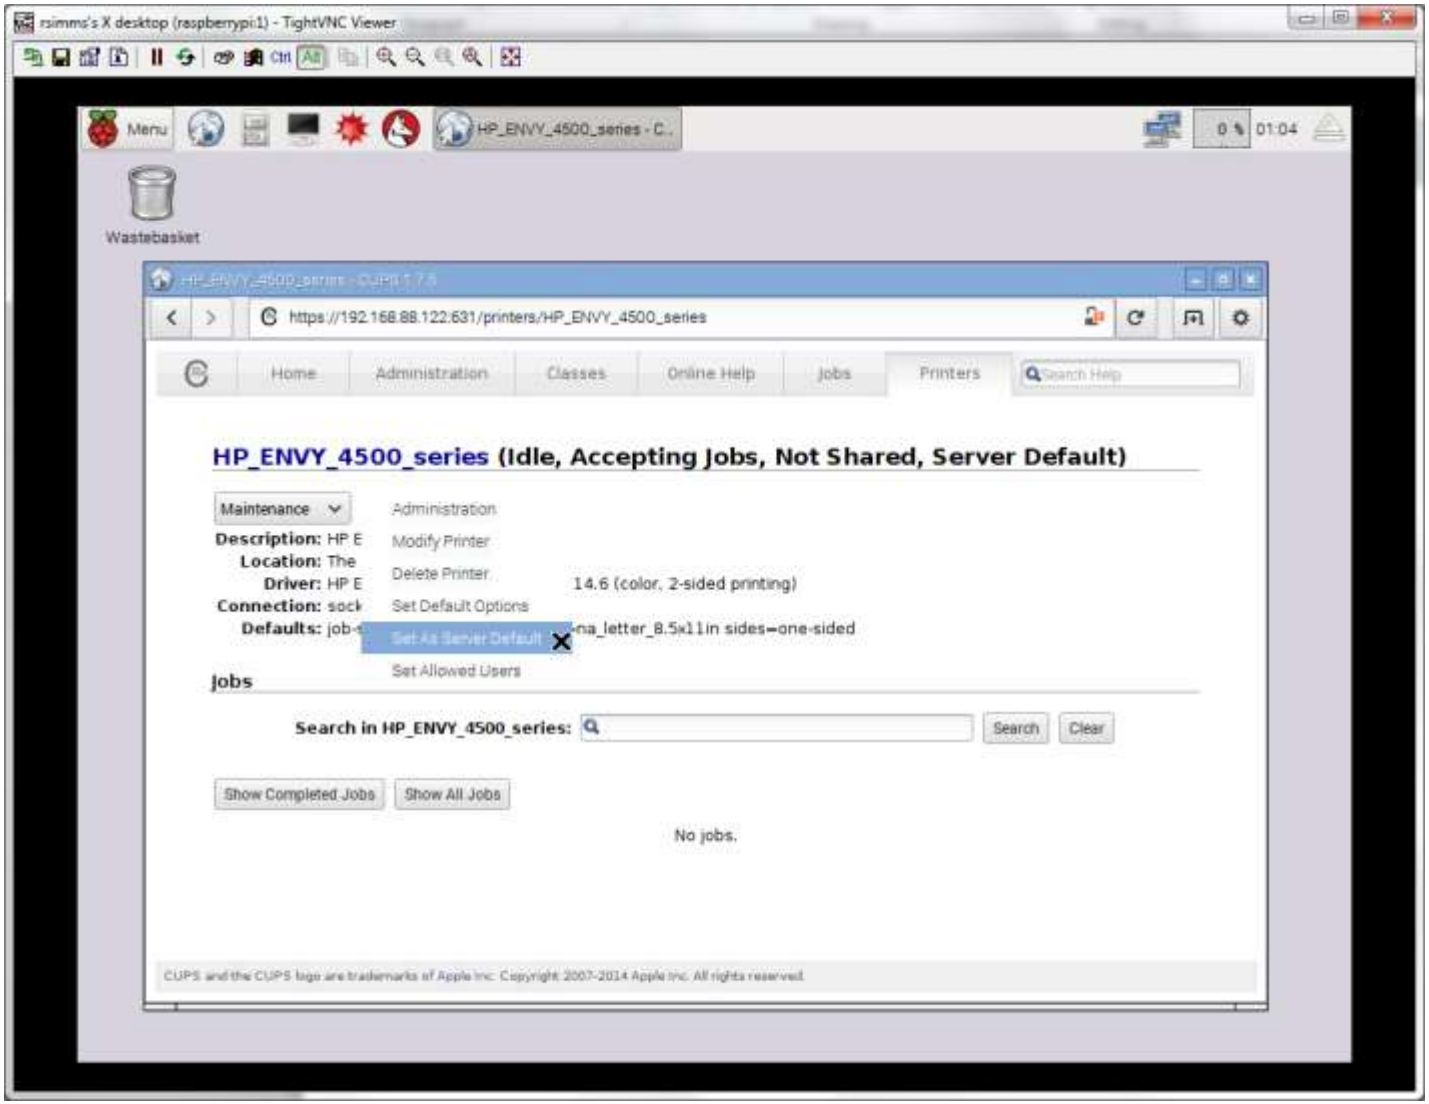
Set printing defaults



Printer added and ready!



Make it the default printer



Test from the command line to verify it works

scp

Copying files between systems

ssh protocol

Secure Shell Protocol

- Allows secure (encrypted) connections between computers
  - **ssh** command - for login and running remote commands
  - **scp** command - for copying files between systems

Copying files on same system

cp command syntax:

cp *<source file> <target file>*

cp *<source file> <target directory>*

cp *<source file> <source file> <target directory>*

cp -r *<source directory branch> <target directory>*

Copying files between systems

Some **scp** command syntax examples:

Capital P (unlike ssh command which uses little p)

scp -P <port> <username@host>**:***<source file> <target file>*

scp -P <port> <username@host>**:***<source file> <target directory>*

scp -P <port> <username@host>**:***<multiple source files> <target directory>*

scp **-r** -P <port> <username@host>**:***<source directory branch> <target directory>*

*When copying files between systems it is necessary to use specify the **hostname** of the remote system. You may also have to specify the **username** if different and the **port** if it is not 22.*

scp practice

Log into your Arya VM

```
/home/cis90/simben $ ssh cis90@arya-02
cis90@arya-02's password:
Welcome to Ubuntu 14.04.1 LTS (GNU/Linux 3.13.0-44-generic x86_64)

 * Documentation:  https://help.ubuntu.com/

226 packages can be updated.
0 updates are security updates.

   _____

 /  /_\  \_  __ <   |  |\__  \
/    |    \  | \/\___  | / __ \_
\____|__  /__|   / ____|(____  /
        \/       \/          \/
       Winter is coming

Last login: Sat Feb 21 18:23:19 2015 from opus.cis.cabrillo.edu
cis90@Arya-02:~$
```

Log into your own Arya VM

We've just logged into the Arya VM from Opus

FYI, alternate ssh commands that would also work from Opus:

```
ssh -p 22 cis90@arya-02
ssh -p 22 cis90@arya-02.cis.cabrillo.edu
```

Copy one file from Opus

scp -P <port> <username@host>:*<source file>* *<target directory>*
scp -P <port> <username@host>:*<source file>* *<target file>*

```
cis90@Arya-02:~$ scp simben90@opus:letter .
simben90@opus's password:
letter                                        100% 1044     1.0KB/s   00:00
cis90@Arya-02:~$

cis90@Arya-02:~$ scp simben90@opus:letter letter
simben90@opus's password:
letter                                      100% 1044     1.0KB/s   00:00
cis90@Arya-02:~$
```

FYI, from off-campus use either of these commands to copy to your home system:

```
scp -P 2220 simben90@oslab.cis.cabrillo.edu:letter .
scp -P 2220 simben90@oslab.cis.cabrillo.edu:letter letter
```

Use your own Opus username and password when trying this

Copy your Shakespeare sonnet files on Opus

scp -P <port> <username@host>**:**<*multiple source files*> <*target directory*>

```
cis90@Arya-02:~$ scp simben90@opus:poems/Shakespeare/sonnet* .
simben90@opus's password:
sonnet1                                       100%  614     0.6KB/s   00:00
sonnet10                                      100%  620     0.6KB/s   00:00
sonnet11                                      100%  689     0.7KB/s   00:00
sonnet15                                      100%  618     0.6KB/s   00:00
sonnet17                                      100%  647     0.6KB/s   00:00
sonnet2                                       100%  631     0.6KB/s   00:00
sonnet26                                      100%  601     0.6KB/s   00:00
sonnet3                                       100%  615     0.6KB/s   00:00
sonnet35                                      100%  598     0.6KB/s   00:00
sonnet4                                       100%  588     0.6KB/s   00:00
sonnet5                                       100%  622     0.6KB/s   00:00
sonnet7                                       100%  581     0.6KB/s   00:00
sonnet9                                       100%  620     0.6KB/s   00:00
cis90@Arya-02:~$
```

FYI, from off-campus use this command to copy to your home system:

```
scp -P 2220 simben90@oslab.cis.cabrillo.edu:poems/Shakespeare/sonnet* .
```

Use your own Opus username and password when trying this

Recursively copy your entire poems/ branch on Opus

scp -r -P <port> <username@host>:<*source directory branch*> <*target directory*>

```
cis90@Arya-02:~$ scp -r simben90@opus:poems .
simben90@opus's password:
sonnet10                      100%  620     0.6KB/s   00:00
sonnet15                      100%  618     0.6KB/s   00:00
sonnet26                      100%  601     0.6KB/s   00:00

cis90@Arya-02:
```

FYI, from off-campus use this command copy to your home system:

```
scp -r -P 2220 simben90@oslab.cis.cabrillo.edu:poems .
```

Use your own Opus username and password when trying this

tar

tar command

- To simplify file transfers, Windows users typically "zip" multiple files together into a single "zipfile".
- UNIX/Linux users use the **tar** command to do this and "archive" multiple files into a single "tarball".

Basic tar command syntax

verbose

specify the archive file

```
tar -c -v -f <tarfile> <files-or-directory-to-archive>
```

***c**reates an archive*

```
tar -t -v -f <tarfile>
```

*views an archive's **t**able of contents*

```
tar -x -v -f <tarfile>
```

*e**x**tracts archive files to the current directory*

Basic tar command syntax

The tar command was written before POSIX command line conventions

tar -c -v -f *<tarfile> <files-or-directory-to-archive>*
tar cvf *<tarfile> <files-or-directory-to-archive>*

are equivalent

tar -t -v -f *<tarfile>*
tar tvf *<tarfile>*

are equivalent

tar -x -v -f *<tarfile>*
tar xvf *<tarfile>*

are equivalent

Example

Backup and restore a directory

Archive your Blake directory of poems

```
/home/cis90/simben $ cd poems/
/home/cis90/simben/poems $ ls -l Blake/
total 8
-r--r--r--. 1 simben90 cis90 582 Nov  7 06:40 jerusalem
-r--r--r--. 1 simben90 cis90 115 Nov  7 06:40 tiger
/home/cis90/simben/poems $ tar cvf blake.tar Blake/
Blake/
Blake/tiger
Blake/jerusalem
/home/cis90/simben/poems $
```

pathname to directory to archive

name of archive file (tarball)

***c**reate verbose file*

Example

Backup and restore a directory

table of contents
verbose
file

name of
archive file
(tarball)

```
/home/cis90/simben/poems $ tar tvf blake.tar
drwxr-xr-x simben90/cis90    0 2013-11-07 06:40 Blake/
-r--r--r-- simben90/cis90  115 2013-11-07 06:40 Blake/tiger
-r--r--r-- simben90/cis90  582 2013-11-07 06:40 Blake/jerusalem
/home/cis90/simben/poems $
```

View new archive's table of contents

Example

Backup and restore a directory

Clobber (remove) your directory of Blake poems

```
/home/cis90/simben/poems $ rm -rf Blake/
/home/cis90/simben/poems $ ls -l Blake
ls: cannot access Blake: No such file or directory
/home/cis90/simben/poems $
```

Uh oh, we just lost all of our Blake poems!

Example

Backup and restore a directory

No problem, we have a backup!

```
/home/cis90/simben/poems $ ls -l Blake
ls: cannot access Blake: No such file or directory
/home/cis90/simben/poems $ tar xvf blake.tar
Blake/
Blake/tiger
Blake/jerusalem
/home/cis90/simben/poems $
/home/cis90/simben/poems $ ls -l Blake
total 8
-r--r--r--. 1 simben90 cis90 582 Nov  7 06:40 jerusalem
-r--r--r--. 1 simben90 cis90 115 Nov  7 06:40 tiger
/home/cis90/simben/poems $
```

extract verbose file

name of archive file (tarball)

Restore your directory of Blake poems

tar

+

scp

Example

Copy archived directory to another system

Backup your bin directory

```
/home/cis90/simben $ ls bin
app     datecal         hi    I          myscript.v1  tryme
banner  enlightenment   home  myscript   treed        zoom

/home/cis90/simben $ tar cvf bin.tar bin/
bin/
bin/enlightenment
bin/treed
bin/zoom
bin/myscript.v1
bin/app
bin/home
bin/hi
bin/myscript
bin/I
bin/tryme
bin/datecal
bin/banner
/home/cis90/simben $
```

create verbose file

name of archive file (tarball)

pathname to directory to archive

Example

Copy archived directory to another system

View your bin archive

```
/home/cis90/simben $ ls -l bin.tar
-rw-rw----. 1 simben90 cis90 40960 Dec  2 07:47 bin.tar

/home/cis90/simben $ tar tvf bin.tar

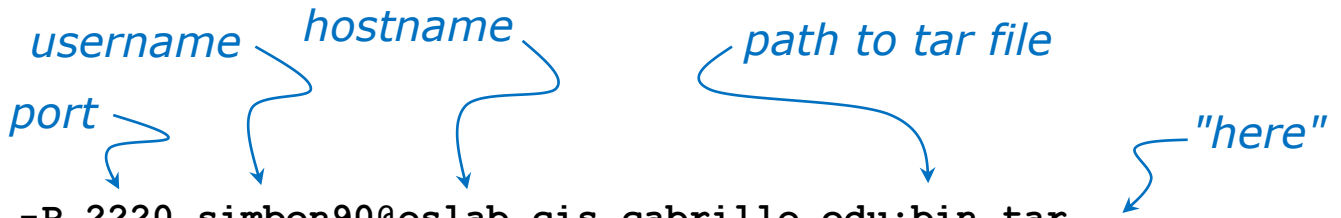
        \/       \/          \/
       Winter is coming

You have mail.
Last login: Tue Dec  2 07:21:57 2014 from opus.cis.cabrillo.edu
cis90@arya-02:~$
```

Login to your own Arya VM from Opus

Example

Copy archived directory to another system



```
cis90@arya-02:~$ scp -P 2220 simben90@oslab.cis.cabrillo.edu:bin.tar .
simben90@oslab.cis.cabrillo.edu's password:
bin.tar                                       100%   40KB  40.0KB/s
00:00

cis90@arya-02:~$ ls -l bin.tar
-rw-rw---- 1 cis90 cis90 40960 Dec  2 07:52 bin.tar
cis90@arya-02:~$
```

Note how archive files are shown in red

Copy your bin archive from Opus to Arya

Example

Copy archived directory to another system

```
cis90@arya-02:~$ tar xvf bin.tar
bin/
bin/enlightenment
bin/treed
bin/zoom
bin/myscript.v1
bin/app
bin/home
bin/hi
bin/myscript
bin/I
bin/tryme
bin/datecal
bin/banner
cis90@arya-02:~$
```

extract verbose file

name of archive file (tarball)

Extract your Opus bin directory to your Arya home directory

```
cis90@arya-02:~$ ls bin
app      datecal        hi    I         myscript.v1  tryme
banner   enlightenment  home  myscript  treed        zoom
cis90@arya-02:~$
```

Example

Copy archived directory to another system

```
cis90@Arya-02:~$ myscript
No command 'myscript' found, did you mean:
 Command 'pyscript' from package 'python-pyscript' (universe)
myscript: command not found
cis90@Arya-02:~$

cis90@arya-02:~$ echo $PATH
/usr/local/sbin:/usr/local/bin:/usr/sbin:/usr/bin:/sbin:/bin:/usr/games:/
usr/local/games
```

Oops, the local bin directory is not on the cis90 user's path!

Example

Copy archived directory to another system

```
cis90@Arya-02:~$ cd bin
cis90@Arya-02:~/bin$ ./myscript
/home/cis90/bin/myscript: line 44: finger: command not found
What is your first name? ^C
cis90@arya-02:~$
```

Hit Ctrl-C to abort myscript

Oops … the finger command used by Benji's script has not been installed on Arya

Example

Copy archived directory to another system

Use sudo to install finger as the root superuser

```
cis90@arya-02:~$ sudo apt-get install finger
Reading package lists... Done
Building dependency tree
Reading state information... Done
The following NEW packages will be installed:
  finger
0 upgraded, 1 newly installed, 0 to remove and 145 not upgraded.
Need to get 0 B/17.3 kB of archives.
After this operation, 68.6 kB of additional disk space will be used.
Selecting previously unselected package finger.
(Reading database ... 290787 files and directories currently installed.)
Preparing to unpack .../finger_0.17-15_amd64.deb ...
Unpacking finger (0.17-15) ...
Processing triggers for man-db (2.6.7.1-1) ...
Setting up finger (0.17-15) ...
cis90@arya-02:~$
```

Example

Copy archived directory to another system

Run myscript file in the bin directory

```
cis90@Arya-02:~/bin$ ./myscript

    CIS, please Enter an option number from the list below:

    1) What is today?
    2) The users on Arya-02
    3) Warning, don't go here!!
    4) Sort current directory
    5) Back pat eCards
    6) Check IP forwarding status

    or enter Q to Quit

    Enter Your Choice:
```

We can ./ it so it will run without updating the path

Housekeeping

Next Class

Project is due next week!

1. No labs due today

2. There is a check script for Lab X2

3. There is no check script for Lab X1. To test permissions copy it to the /tmp directory and run it using the cis90 user account.

4. One week from now (see calendar)
   - Project due on by 11:59PM.
   - If you haven't started yet, now would be a good time!

5. Monday Dec 14th (see calendar)
   - Final Exam (Test #3) 1-2:50PM.
   - Extra credit labs are due by 11:59PM.

Make backup copies of your script

modify, debug, modify, debug, … rest

```
/home/cis90/simben/bin $ cp myscript myscript.v1
```

modify, debug, modify, debug, … rest

```
/home/cis90/simben/bin $ cp myscript myscript.v2
```

modify, debug, modify, debug, … rest

```
/home/cis90/simben/bin $ cp myscript myscript.v3
```

Spring 2016 Linux Classes and Prerequisites

CIS 90 Introduction to UNIX/Linux

Provides a technical overview of the UNIX/Linux operating system, including hands-on experience with commands, files, and tools. Recommended preparation CS 1L or CIS 72.
Transfer Credit: CSU; UC.

Section	Days	Times	Units	Instructor	Room
91342	W	9:00AM-12:05PM	3.00	R.Simms	OL
&	Arr.	Arr.		R.Simms	OL

Section 91342 is an ONLINE course. Meets weekly throughout the semester online during the scheduled times by remote technology with an additional 50 min arranged online lab per week. For details, see instructor's web page at go.cabrillo.edu/online.

91343	W	9:00AM-12:05PM	3.00	R.Simms	828
&	Arr.	Arr.		R.Simms	OL

Section 91343 is a Hybrid ONLINE course. Meets weekly throughout the semester at the scheduled times with an additional 50 min online lab per week. For details, see instructor's web page at go.cabrillo.edu/online.

CIS 98 UNIX/Linux Shell Programming

Presents an introduction to shell programming in a UNIX/Linux environment, and is designed for system administrators or technical users with little or no programming background. Prerequisite: CIS 90.
Transfer Credit: CSU; UC.

Section	Days	Times	Units	Instructor	Room
92784	Arr.	Arr.	4.00	M.Matera	OL

Section 92784 is an ONLINE course. For details, see instructor's web page at go.cabrillo.edu/online.

92785	TH	10:00AM-2:05PM	4.00	M.Matera	829
&	Arr.	Arr.		M.Matera	OL

Section 92785 is a Hybrid ONLINE course. Meets weekly throughout the semester at the scheduled times with an additional 50 min online lab per week. Students will be required to show that they meet the course prerequisites. For details, see instructor's web page at go.cabrillo.edu/online.

CIS 192AB UNIX/Linux Network Administration

Teaches the building of network infrastructures, and the installation, configuration, and protection services on Linux TCP/IP networks. Prerequisites: CIS 81 and CIS 90 or equivalent skills. Recommended Preparation: CIS 191AB.

Section	Days	Times	Units	Instructor	Room
91328	Arr.	Arr.	4.00	M.Matera	OL

Section 91328 is an ONLINE course. For details, see instructor's web page at go.cabrillo.edu/online.

91329	**TH**	**5:30PM-9:35PM**	**4.00**	**M.Matera**	**828**
&	**Arr.**	**Arr.**		**M.Matera**	**OL**

Section 91329 is a Hybrid ONLINE course. Meets weekly throughout the semester at the scheduled times with an additional 50 min online lab per week. Students will be required to show that they meet the course prerequisites. For details,see instructor's web page at go.cabrillo.edu/online.

Heads up on Final Exam

Test #3 (final exam) is MONDAY Dec 14 1-3:50PM

Monday	12/14	**Test #3 (the final exam)** **Time** • MONDAY 1:00PM - 3:50PM in Room 828 **Materials** • Test (blackboard) **CCC Confer** • Enter virtual classroom • Class archives		5 posts Lab X1 Lab X2

Extra credit labs and final posts due by 11:59PM

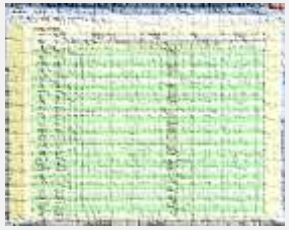
- All students will take the test at the same time. The test must be completed by 3:50PM.
- Working and long distance students can take the test online via CCC Confer and BlackBoard.
- **Working students will need to plan ahead to take time off from work for the test.**

Where to find your grades

Send me your survey to get your LOR code name.

The CIS 90 website Grades page

http://simms-teach.com/cis90grades.php



Points that could have been earned:

10 quizzes:	30 points
10 labs:	300 points
2 tests:	60 points
3 forum quarters:	60 points
Total:	**450 points**

Percentage	Total Points	Letter Grade	Pass/No Pass
90% or higher	504 or higher	A	Pass
80% to 89.9%	448 to 503	B	Pass
70% to 79.9%	392 to 447	C	Pass
60% to 69.9%	336 to 391	D	No pass
0% to 59.9%	0 to 335	F	No pass

At the end of the term I'll add up all your points and assign you a grade using this table

Or check on Opus

checkgrades *codename*

(where codename is your LOR codename)

Written by Jesse Warren a past CIS 90 Alumnus

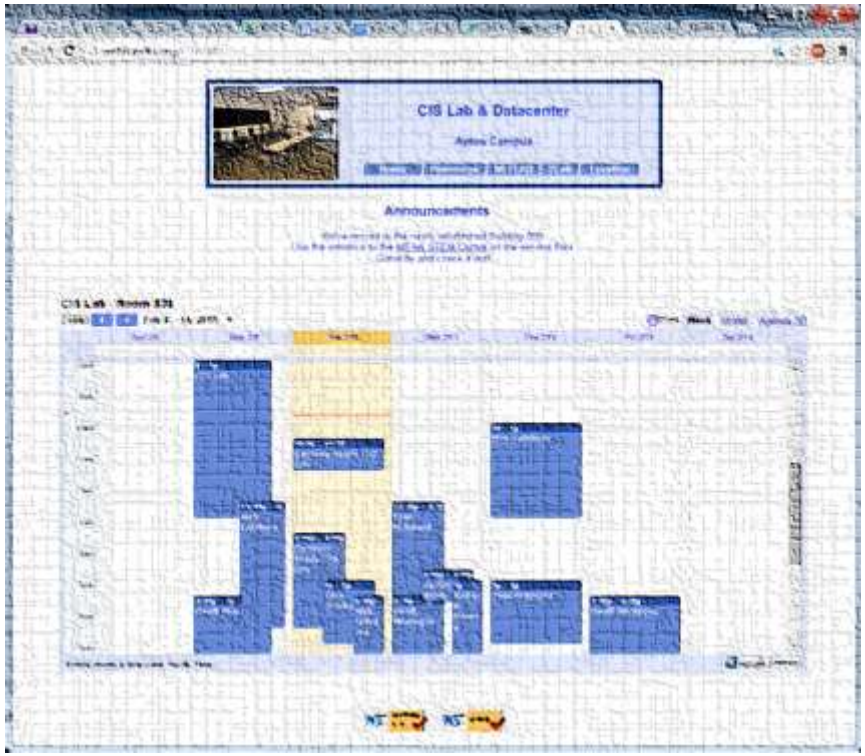
grades *codename*

(where codename is your LOR codename)

Written by Sam Tindell a past CIS 90 Alumnus. Try his tips, schedule and forums scripts as well!

Would you like some help learning Linux?

If you would like some additional come over to the CIS Lab. There are student lab assistants and instructors there to help you.



Tess, Michael, and Sam are CIS 90 Alumni.

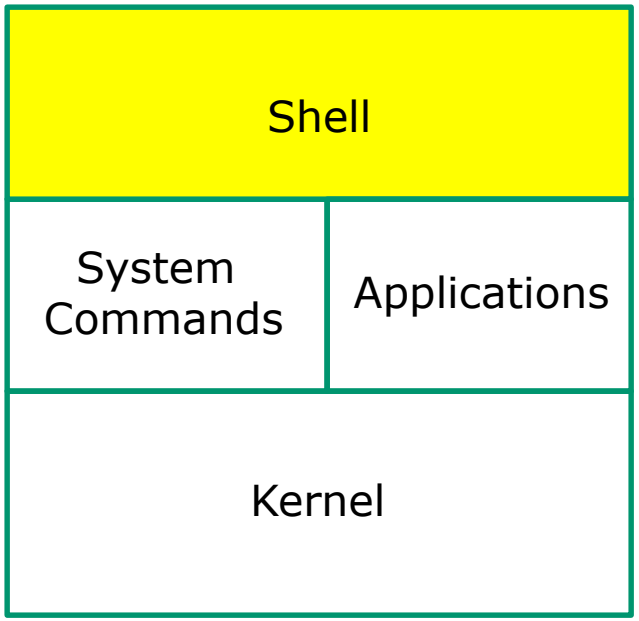
Mike Matera is the other Linux instructor.

I'm in there Mondays.

Refresh

UNIX/Linux Architecture

The Shell



- Allows users to interact with the computer via a "command line".
- Prompts for a command, parses the command, finds the right program and gets that program executed.
- Called a "shell" because it hides the underlying operating system.
- Many shell programs are available: sh (Bourne shell), bash (Bourne Again shell), csh (C shell), ksh (Korn shell).
- **A user interface and a programming language (scripts).**
- GNOME and KDE desktops could be called graphical shells

Shell Scripts

Some scripts on opus

1) /home/cis90/bin/riddle1
2) /home/cis90/bin/allscripts
3) /etc/rc.d/init.d/network
4) /usr/bin/spell
5) /usr/bin/vimtutor
6) ~/bin/enlightenment

You have read permission for all these scripts. You can use cat, more, less, or even vi to view them

Many commands are scripts

Which commands in /bin are really scripts?

```
file /bin/* | grep script
```

How many commands in /bin are scripts?

```
file /bin/* | grep script | wc -l
```

Class Activity
Scripting

Of all the UNIX/Linux commands in:

/bin

/usr/bin

/sbin

/usr/sbin

How many are scripts?

Write your answer in the chat window

Project

Get started on the project!
(If you haven't already)

1. Create a file in your bin directory named *myscript*:
   - Copy from */home/cis90/depot/myscript*
   - or copy and paste template code from:
     http://simms-teach.com/docs/cis90/cis90final-project.pdf

2. Give yourself full permissions and give CIS 90 group read and execute permissions
   - **chmod 750 myscript**

3. Run **allscripts** and verify your script will run without any errors

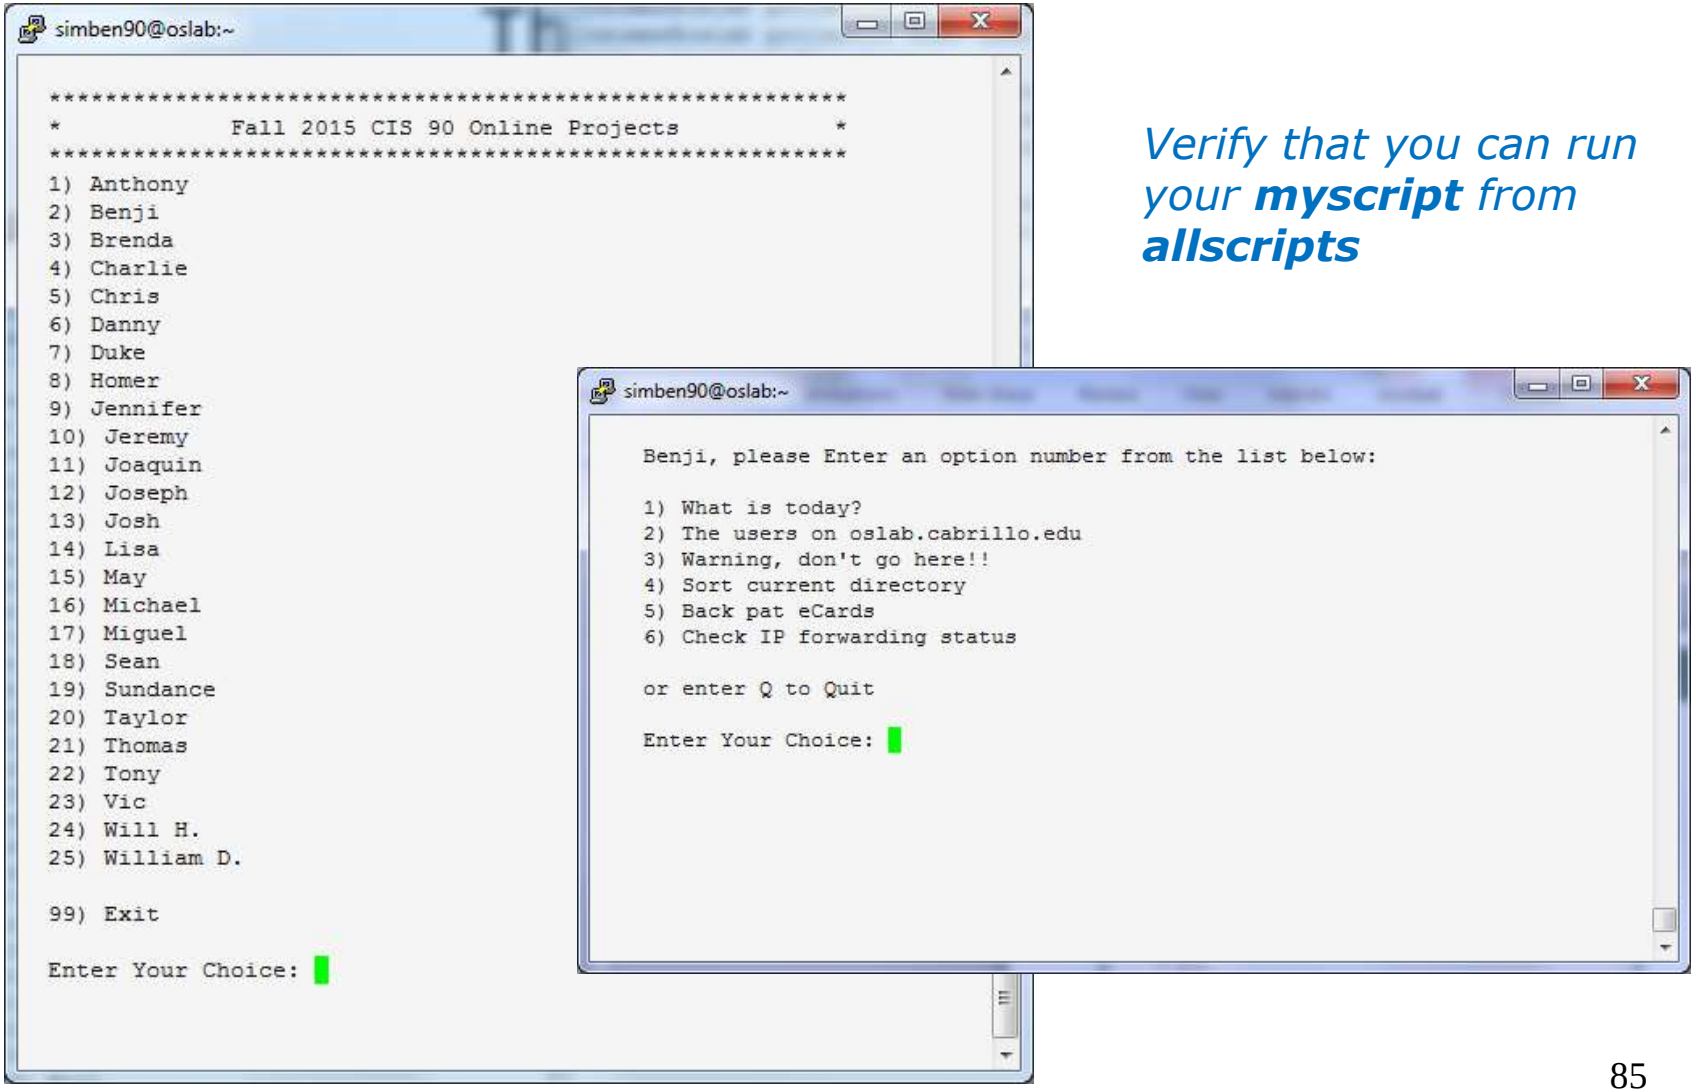
4. Do the example grep task shown in Lesson 13

Grading rubric (60 points maximum)

Possible Points	Requirements
30	Implementing all five tasks (6 points each): • Requirements for each task: – Minimum of 10 "original" script command lines – Has one or more non-generic comments to explain what it is doing – Has user interaction
25	You don't have to do all of these but do at least five: • Redirecting stdin (5 points) • Redirecting stdout (5 points) • Redirecting stderr (5 points) • Use of permissions (5 points) • Use of filename expansion characters (5 points) • Use of absolute path (5 points) • Use of relative path (5 points) • Use of a PID (5 points) • Use of inodes (5 points) • Use of links (5 points) • Use of scheduling (5 points) • Use of a GID or group (5 points) • Use of a UID or user (5 points) • Use of a /dev/tty device (5 points) • Use of a signal (5 points) • Use of piping (5 points) • Use of an environment variable (5 points) • Use of /bin/mail (5 points) • Use of a conditional (5 points) The maximum for this section is 25 points.
5	Present your script to the class
Points lost	
-15	Fails to run from **allscripts**
-15	Other students in the class are unable to read and execute your script.
-15	Error messages are displayed when running one or more tasks
-up to 90	No credit for any task which contains unoriginal script code that: • Doesn't give full credit to the original author • Doesn't indicate where the code was obtained from • Doesn't include licensing terms • Violates copyright or licensing terms
Extra credit	
30	Up to three additional tasks (10 points each)

This applies to each individual task

This applies to the project as a whole



*Verify that you can run your **myscript** from **allscripts***

Don't forget to do this!

chmod 750 ~
chmod 750 ~/bin
chmod 750 ~/bin/myscript

Points lost	
-15	Fails to run from **allscripts**
-15	Other students in the class are unable to read and execute your script.
-15	Error messages are displayed when running one or more tasks
-up to 90	No credit for any task which contains unoriginal script code that: • Doesn't give full credit to the original author • Doesn't indicate where the code was obtained from • Doesn't include licensing terms • Violates copyright or licensing terms

Project Status

`ls -l /home/cis90/*/bin/myscript`

```

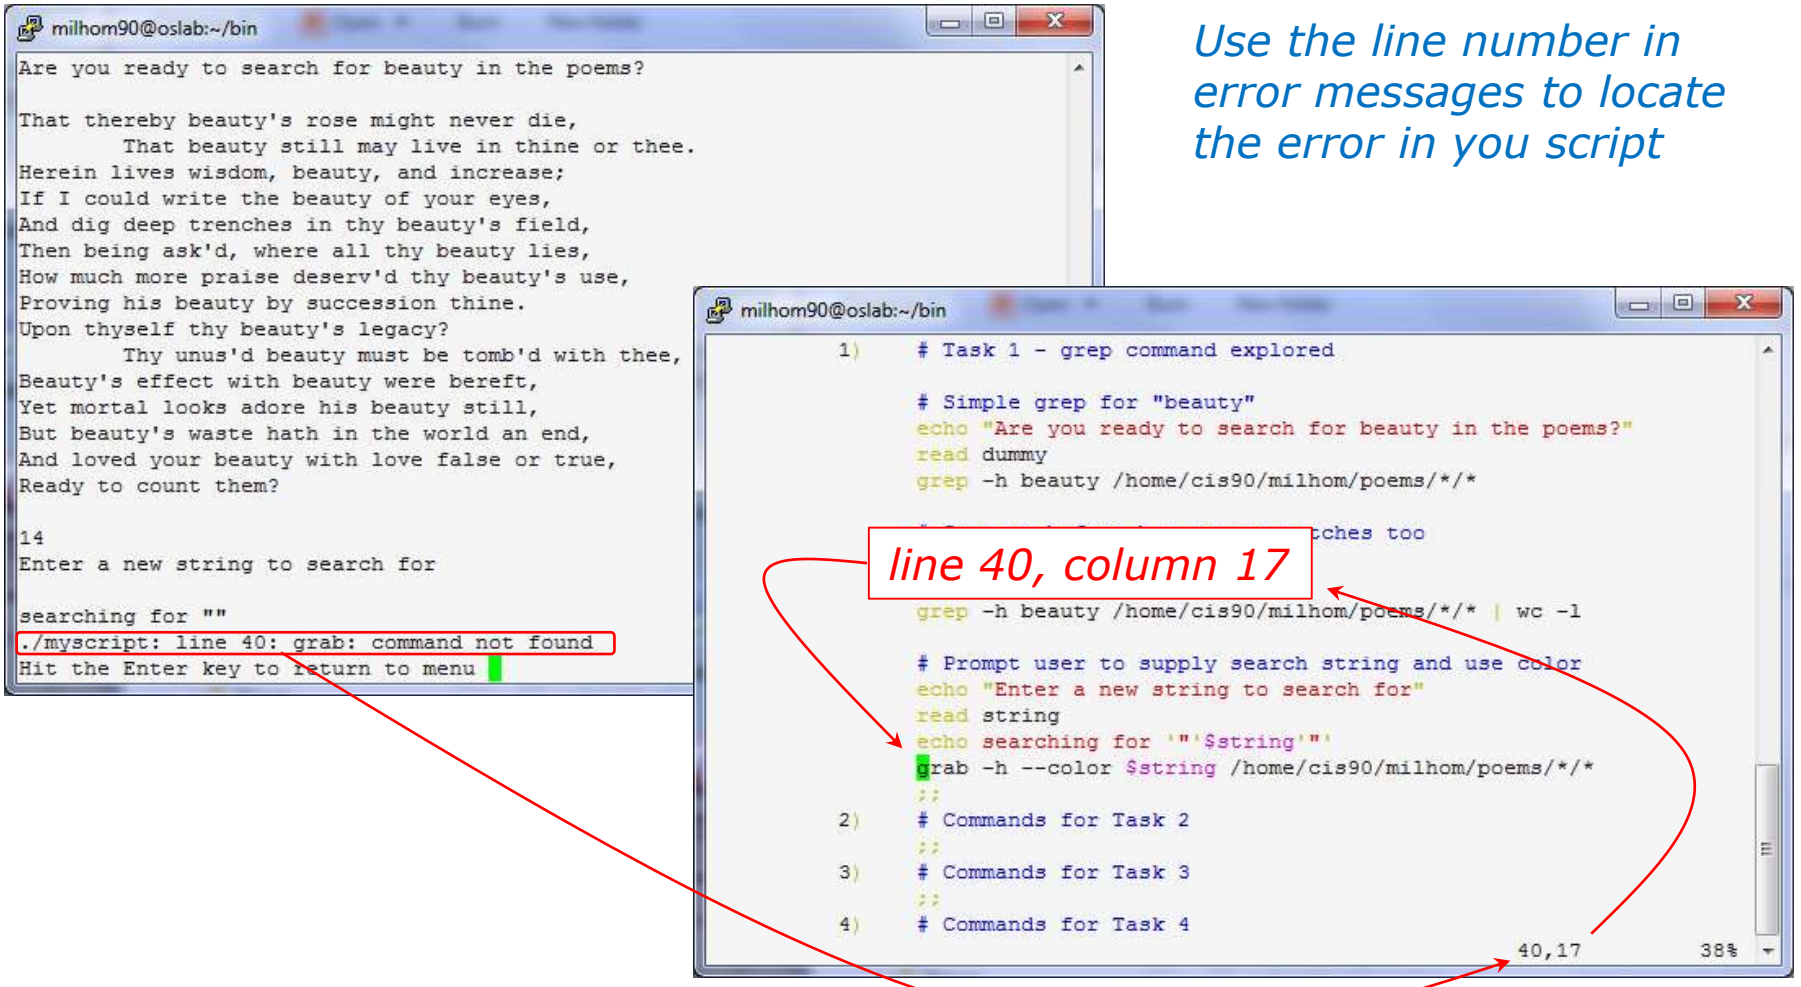
Scripting Tips vi

Line Numbers in errors and vi



Use the line number in error messages to locate the error in you script

Color Syntax

```
milhom90@oslab:~/bin
/home/cis90/milhom/bin $ ./myscript
./myscript: line 79: unexpected EOF while looking for matching `"'
./myscript: line 83: syntax error: unexpected end of file
/home/cis90/milhom/bin $
```

```
milhom90@oslab:~/bin
            grep -h beauty /home/cis90/milhom/poems/*/*

            # Same as before but counts matches too
            echo "Ready to count them?"
            read dummy
            grep -h beauty /home/cis90/milhom/poems/*/* | wc -l

            # Prompt user to supply search string and use color
            echo "Enter a new string to search for'
            read string
            echo searching for '"'$string'"'
            grab -h --color $string /home/cis90/milhom/poems/*/*
            ;;
        2)  # Commands for Task 2
            ;;
        3)  # Commands for Task 3
            ;;
        4)  # Commands for Task 4
            ;;
        5)  # A simple if statement
            echo -n "Enter d or c: "
            read answer

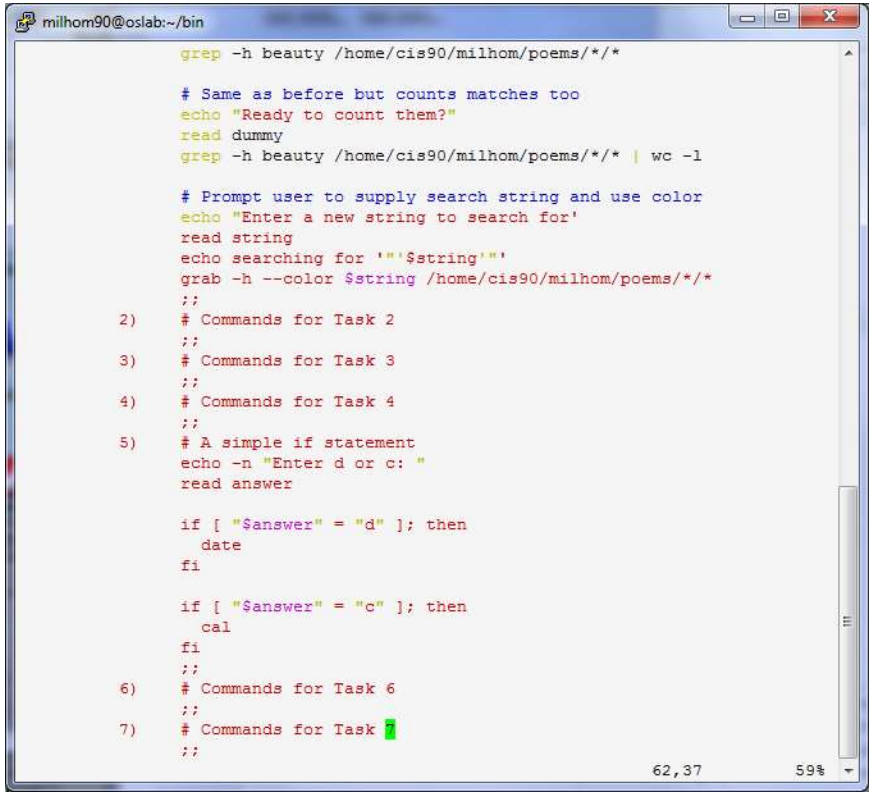
            if [ "$answer" = "d" ]; then
              date
            fi

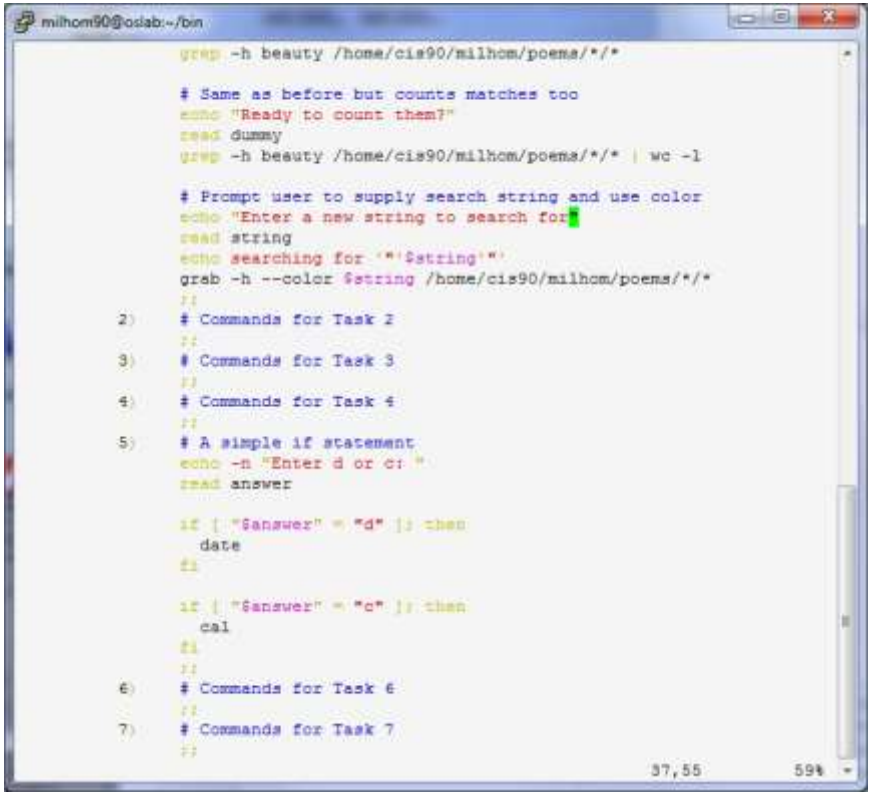
            if [ "$answer" = "c" ]; then
              cal
            fi
            ;;
        6)  # Commands for Task 6
            ;;
        7)  # Commands for Task 7
            ;;
                                                    62,37         59%
```

Use color syntax to spot unmatched quotes

Is there a problem with this script? Where exactly is the problem?

Color Syntax

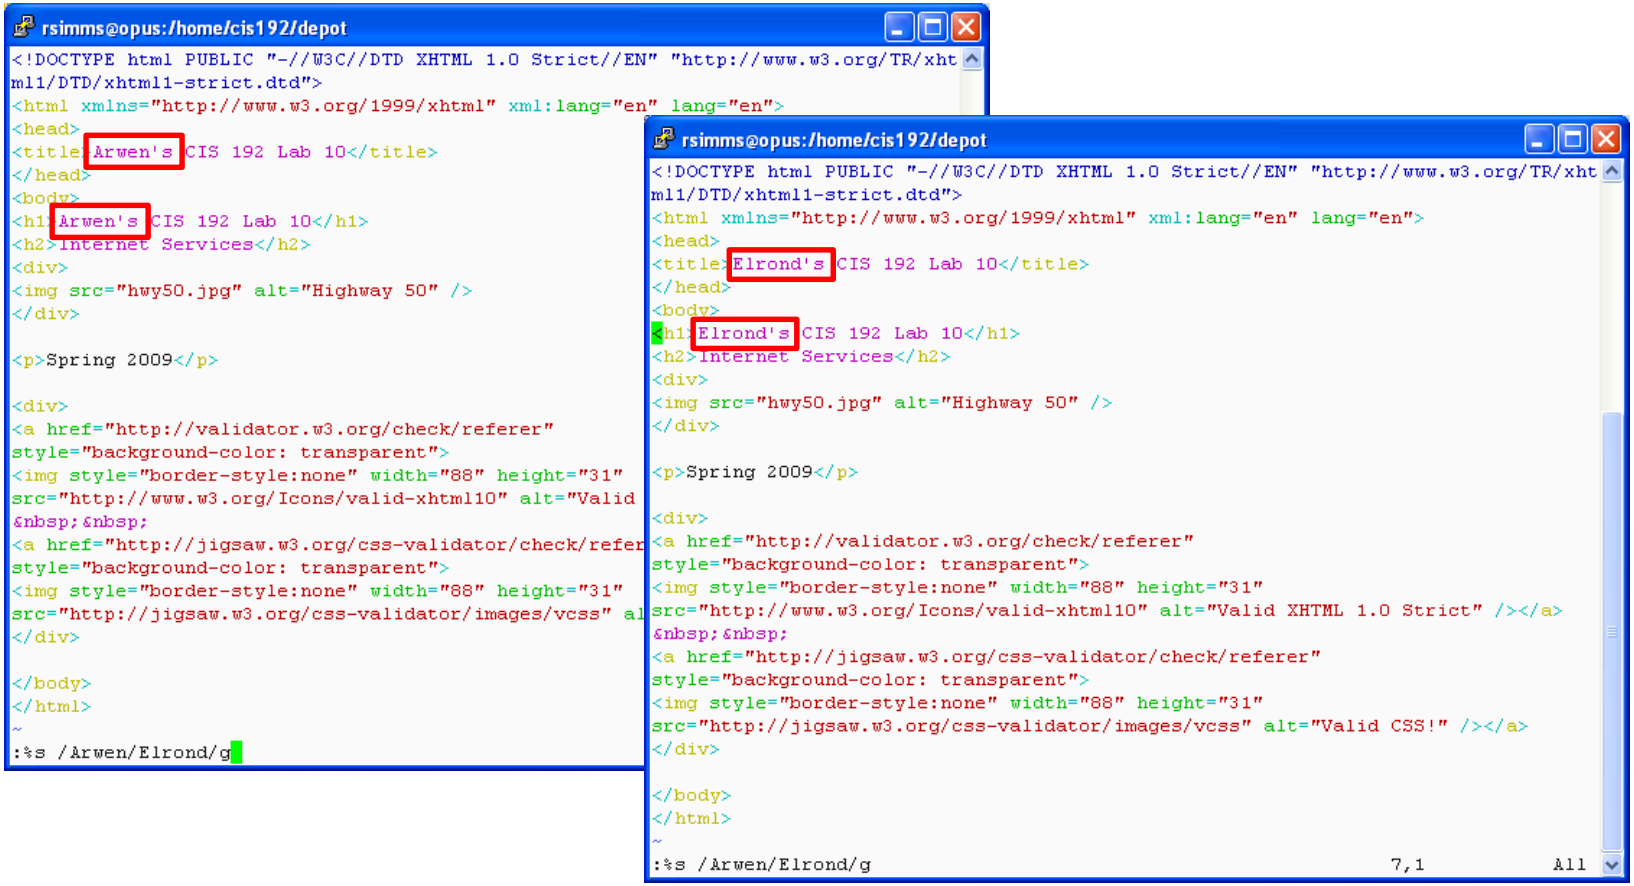




One small change for script developer, one giant leap for script execution

Global search and replace with vi

<esc>:
%s /oldstring/newstring/g



Scripting Tips

sleep

(adding timed pauses)

Class Exercise

Make a new script in your bin directory

```
cd bin
vi example911
```

In vi add these lines then save:

```
echo help
sleep 3
echo Help
sleep 2
echo HELP
sleep 1
banner HELP
```

Prepare and run your script

```
chmod +x example911
example911
```

Scripting Tips

$(cmd) and `cmd`

Using $(cmd)

Sometimes you want to capture the output of a command and store in a variable or use as an argument

For example:

```
/home/cis90/simben $ find /bin | wc -l
113

/home/cis90/simben $ count=$(find /bin | wc -l)

/home/cis90/simben $ echo "There are $count files in /bin"
There are 113 files in /bin
```

Using $() instead of back tics is an alternate way to do the same thing

Using back ticks

Sometimes you want to capture the output of a command and store in a variable or use as an argument

For example:

```
/home/cis90/simben $ find /bin | wc -l
113

/home/cis90/simben $ count=`find /bin | wc -l`

/home/cis90/simben $ echo "There are $count files in /bin"
There are 113 files in /bin
```

Class Exercise

Make a short script named example401 that emails a banner of your full name to yourself:

Make a new script in your bin directory

```
cd bin
vi example401
```

In vi add these lines then save:

```
name=$(cat /etc/passwd | grep $LOGNAME | cut -f5 -d":" )
banner $(echo $name) | mail -s "$name" $LOGNAME
```

Prepare and run your script

```
chmod +x example401
example401
```

Read your mail to view your new message

```
mail
```

Scripting Tips

simple if statement

myscript

If statements are used to test if a condition is true and if so execute a specific set of commands

```
5)      # Simple if statement
        echo -n "Enter d or c: "
        read answer

        if [ "$answer" = "d" ]; then
           date
        fi

        if [ "$answer" = "c" ]; then
           cal
        fi

        ;;
```

*The **date** command is executed only if the user typed a "d"*

*The **cal** command is executed only if the user typed a "c"*

*An **if** statement is ended with **fi** (if spelled backward)*

myscript

```

[rsimms@opus bin]$ echo "The fifth file in this directory is $5"
The fifth file in this directory is enlightenment
[rsimms@opus bin]$
```

A nice way to be able to reference specific files in a directory

```
[rsimms@opus scripts]$ finger $LOGNAME
Login: rsimms                           Name: Rich Simms
Directory: /home/rsimms                 Shell: /bin/bash
On since Mon May 18 14:38 (PDT) on pts/1 from 207.62.186.30
Mail last read Mon May 18 16:09 2009 (PDT)
No Plan.

[rsimms@opus scripts]$ finger $LOGNAME | head -1
Login: rsimms                           Name: Rich Simms

[rsimms@opus scripts]$ set $(finger $LOGNAME | head -1)

[rsimms@opus scripts]$ echo $1
Login:

[rsimms@opus scripts]$ echo $2
rsimms

[rsimms@opus scripts]$ echo $3
Name:

[rsimms@opus scripts]$ echo $4
Rich

[rsimms@opus scripts]$ echo $5
Simms

[rsimms@opus scripts]$ firstname=$4

[rsimms@opus bin]$ echo My first name is $firstname
My first name is Rich
```

Another way to get a user's first name

Class Exercise

Make a new script in your bin directory

```
cd bin
    vi example777
```

In vi add these lines to your script then save:

```
    set $(finger $LOGNAME | head -1)
    firstname=$4
    echo My first name is $firstname
```

Prepare and run your script

```
    chmod +x example777
    example777
```

Scripting Tips

color

Using Color

Black 0;30	Green 0;32	Red 0;31	Brown 0;33
Dark Gray 1;30	Light Green 1;32	Light Red 1;31	Yellow 1;33
Blue 0;34	Cyan 0;36	Purple 0;35	Light Gray 0;37
Light Blue 1;34	Light Cyan 1;36	Light Purple 1;35	White 1;37

```
/home/cis90/simben/bin $ echo -e "\e[00;31mMy favorite color is RED\e[00m"
My favorite color is RED
/home/cis90/simben/bin $ echo -e "\e[00;34mMy favorite color is BLUE\e[00m"
My favorite color is BLUE
/home/cis90/simben/bin $ echo -e "\e[00;32mMy favorite color is GREEN\e[00m"
My favorite color is GREEN
/home/cis90/simben/bin $
```

*Use **echo -e "\e[0**n;nn**m"** to turn on color and **\e[00m** to turn it off.*

(the -e option enables interpretation of backslash escapes)

Source: http://hacktux.com/bash/colors

Using Color

```
/home/cis90/simben/bin $ echo -e "\e[00;32m"

/home/cis90/simben/bin $ head -4 ~/letter
Hello Mother!  Hello Father!

Here I am at Camp Granada.  Things are very entertaining,
and they say we'll have some fun when it stops raining.
/home/cis90/simben/bin $ echo -e '\e[00m'

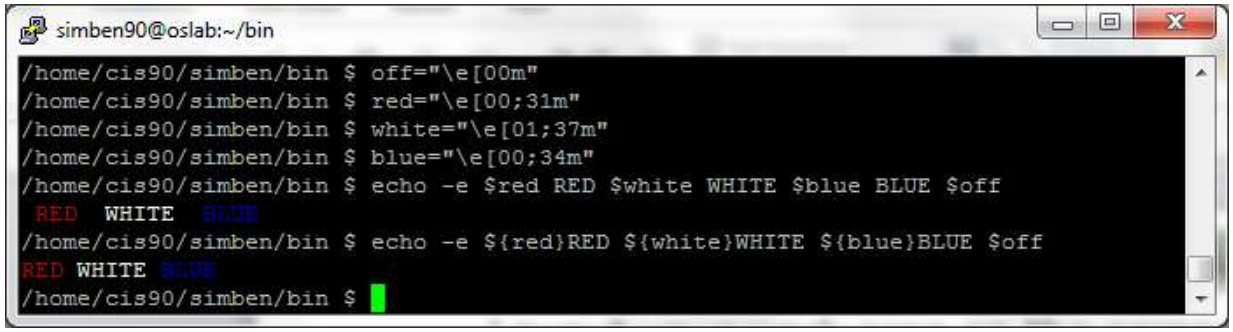
/home/cis90/simben/bin $
```

Change to color green

Revert color back to normal

Source: http://hacktux.com/bash/colors

Using Color



```
off="\e[00m"
red="\e[00;31m"
white="\e[01;37m"
blue="\e[00;34m"
echo -e $red RED $white WHITE $blue BLUE $off
 RED  WHITE  BLUE
echo -e ${red}RED ${white}WHITE ${blue}BLUE $off
RED WHITE BLUE
```

Demonstrating the use of variables and curly braces to make color easier to use.

Curly braces are used to clearly separate the variable name from adjacent text strings:

- $redRED is null
- ${red}RED is "\e[00;31mRED"

Class Exercise

Make a new script in your bin directory

```
cd bin
vi example4271
```

In vi add these lines to your script then save:

```
off="\e[00m"
green="\e[00;32m"
echo -e Hi there, you look a little ${green}GREEN${off} today!
```

Prepare and run your script

```
chmod +x example4271
example4271
```

Scripting Tips

Opus usernames to home directories and vice-versa

Going from CIS 90 home directory name ➔ username

```
/home/cis90/simben $ echo $HOME
/home/cis90/simben

/home/cis90/simben $ basename $HOME
simben
```

*The **basename** command extracts the filename from the end of a pathname*

```
/home/cis90/simben $ echo $(basename $HOME)
simben

/home/cis90/simben $ echo $(basename $HOME)90
simben90
```

This is how you tack 90 on to the home directory filename

```
/home/cis90/simben $ userid=`echo $(basename $HOME)90`
/home/cis90/simben $ echo The home directory of $userid is $HOME
The home directory of simben90 is /home/cis90/simben
```

Going from CIS 90 home directory name ➔ username

```
/home/cis90/simben $ finger $(basename $HOME)90
Login: simben90                         Name: Benji Simms
Directory: /home/cis90/simben           Shell: /bin/bash
On since Wed May 16 08:09 (PDT) on pts/2 from 50-0-68-
235.dsl.dynamic.fusionbroadband.com
No mail.
Plan:
To pass this course with flying colors!
```

*Determining the username from the home directory name and then using it as an argument to the **finger** command*

Going from CIS 90 username ➔ home directory name

```
/home/cis90/simben $ echo $LOGNAME
simben90
```

This variable holds your username

```
/home/cis90/simben $ echo ${LOGNAME%90}
simben
```

This is how you strip text off the end of a string

```
/home/cis90/simben $ file=`echo ${LOGNAME%90}`
/home/cis90/simben $ echo $file
simben
```

*This sets a new variable named **file** to hold the filename*

```
/home/cis90/simben $ echo The home of $LOGNAME is /home/cis90/$file
The home of simben90 is /home/cis90/simben
```

And this is how you could use it

Going from CIS 90 username ➔ home directory name

Another way to do the same thing

```
/home/cis90/simben/bin $ homeDir=$(grep $LOGNAME /etc/passwd | cut -f6 -d":")
/home/cis90/simben/bin $ echo The home of $LOGNAME is $homeDir
The home of simben90 is /home/cis90/simben
```

The 6th field of every line in /etc/passwd is the that user's home directory

Scripting Tips

Simple for loop

for loop example

```
/home/cis90/milhom/bin $ for i in hugo sun jin john charlie
> do
> echo Hello $i
> done
Hello hugo
Hello sun
Hello jin
Hello john
Hello charlie
/home/cis90/milhom/bin $
```

for loop example

```
/home/cis90/milhom/bin $ for file in $(ls /usr/bin/pi*)
> do
> echo I found a file named $file
> done
I found a file named /usr/bin/pic
I found a file named /usr/bin/pic2graph
I found a file named /usr/bin/piconv
I found a file named /usr/bin/pidstat
I found a file named /usr/bin/pinentry
I found a file named /usr/bin/pinentry-curses
I found a file named /usr/bin/pinfo
I found a file named /usr/bin/pinky
/home/cis90/milhom/bin $
```

Class Exercise

Make a new script in your bin directory

```
cd bin
vi example808
```

In vi add these lines to your script then save:

```
for name in $(grep cis90 /etc/passwd | cut -f5 -d":" | cut -f1 -d" ")
do
  echo My classmate is named $name
done
```

Prepare and run your script

```
chmod +x example808
example808
```

Assignment

Next Class

Project is due next week!

Finish your project!

Cabrillo College

CIS 90 Final Project

Developing a bash script

Fall 2015

Final Project

For the final project you will be writing custom front-ends to your favorite Linux commands. To do this you will write a shell script that interacts with the user to get input, then use that input to call a Linux command. You will start with a template that you can modify and extend.

Forum

Use the forum to brainstorm script ideas, clarify requirements, and get help if you are stuck. When you have tested your script and think it is bug free then use the forum to ask others to test it some more. Post any valuable tips or lessons learned as well. Forum is at: http://oslab.cis.cabrillo.edu/forum/

Commands

.	echo	lpstat	sort
at	env	ls	spell
banner	exit	mail	su
bash	export	man	tail
bc	file	mesg	tee
cal	find	mkdir	touch
cancel	finger	more	type
cat	grep	mv	umask
cd	head	passwd	uname
chgrp	history	ps	unset
chmod	id	pwd	vi
chown	jobs	rm	wc
clear	kill	rmdir	who
cp	ln	set	write
date	lp/lpr	sleep	xxd

Be sure to review the grading rubric to make sure you didn't miss anything.

Wrap up

Commands:

basename	- extract filename form pathname
scp	- secure copy command
tar	- archive command
if then else	- conditionals in scripts
[ ]	- for logic tests in scripts

Next Class

Assignment: Check Calendar Page on web site to see what is due next week.

No Quiz
Project due

Work on final project - due in one week

Optional extra credit labs

Project Workshop

- Make sure you get one "starter" task scripted and working before leaving class today.
- Grade your starter script using the Final Project rubric

Implementing all five tasks (6 points each):
- Requirements for each task:
  - –Minimum of 10 "original" script command lines
  - –Has one or more non-generic comments to explain what it is doing
  - –Has user interaction

You don't have to do all of these but do at least five:
- Redirecting stdin (5 points)
- Redirecting stdout (5 points)
- Redirecting stderr (5 points)
- Use of permissions (5 points)
- Use of filename expansion characters (5 points)
- Use of absolute path (5 points)
- Use of relative path (5 points)
- Use of a PID (5 points)
- Use of inodes (5 points)
- Use of links (5 points)
- Use of scheduling (5 points)
- Use of a GID or group (5 points)
- Use of a UID or user (5 points)
- Use of a /dev/tty device (5 points)
- Use of a signal (5 points)
- Use of piping (5 points)
- Use of an environment variable (5 points)
- Use of /bin/mail (5 points)
- Use of a conditional (5 points)

The maximum for this section is 25 points.
